Hill,2018-02-23 I have always felt that we have greatest country in the world It has always given me great pleasure to see honest hardworking people and who are willing to take risks to get ahead and succeed I always felt that this was that America got to be great and that we all should be working hard to help improve our own lives and the lives of others by carrying on this great American tradition As a result of being brought up with this thinking I am more than willing to go out of my way to try to help people succeed and obtain their goals To see people succeed in their life s goals and ambitions has always been very gratifying to me and given me a good feeling Another thing that always gives me a good feeling is to see couples doing things as a family and with their

children To me this is what life is all about and should be about Many of this new generations of do gooders as they are often called seem to think that everybody should live on handouts and that anyone who is successful should be cut back down and not allowed to succeed without their input as this is not fair to the less fortunate in this country What they do not seem to realize or don't want to realize is that the people who are more successful probably do more to help the less fortunate than all the government and giveaway programs can ever hope to do A successful person who has obtained his achievements through hard honest work is usually willing to try to help others reach similar success A person who is successful usually lives in a little better house Many now think that this is wrong but that person probably pays several times the property taxes of someone living in a less expensive home This will benefit everyone as this helps to educate their children and pay for many of the local services that people demand today If they hire people to help take care of their homes or properties they are usually paid for with after tax dollars and this creates jobs for the people doing the work Isn't this sharing the wealth Most successful people help create jobs either by expanding their own business or investing in other business I think that in order to get people off welfare and off the government rolls we need all the successful people that we can get in this country

Nippert-Eng,2010-09-15 Everyone worries about privacy these days As corporations and governments devise increasingly sophisticated data gathering tools and joining Facebook verges on obligatory concerns over the use and abuse of personal information are undeniable But the way privacy functions on the virtual frontier of the Internet is only a subset of the fascinating ways we work to achieve it throughout our everyday lives In *Islands of Privacy* Christena Nippert Eng pries open the blinds giving us an intimate view

into the full range of ordinary people's sometimes extraordinary efforts to preserve the border between themselves and the rest of the world. Packed with stories that are funny and sad, familiar and strange, *Islands of Privacy* tours the myriad arenas where privacy battles are fought, lost and won. Nippert Eng explores how we manage our secrets, our phone calls and e-mail, the perimeters of our homes and our interactions with neighbors. She discovers that everybody practices the art of selectively concealing and disclosing information on a daily basis. This important balancing act governs a wide range of behaviors from deciding whether to give our bosses our cell phone numbers to choosing what we carry in our wallets or purses. Violations of privacy and anxiety about how we grant it to each other also come under Nippert Eng's microscope as she crafts a compelling argument that successfully managing privacy is critical for successfully maintaining our relationships with each other and our selves. Roaming from the beach to the bank and from the bathroom to the bus, Nippert Eng's keenly observed and vividly told book gives us the skinny on how we defend our shrinking islands of privacy in the vast ocean of accessibility that surrounds us.

We Have Overcome Jason D. Hill, 2018-07-10 It has been more than fifty years since the Civil Rights Act enshrined equality under the law for all Americans. Since that time, America has enjoyed an era of unprecedented prosperity, domestic and international peace, and technological advancement. It's almost as if removing the shackles of enforced racial discrimination has liberated Americans of all races and ethnicities to become their better selves and to work toward common goals in ways that our ancestors would have envied. But the dominant narrative repeated in the media and from the angry mouths of politicians and activists is the exact opposite of the reality. They paint a portrait of an America rife with racial and ethnic division where minorities are mired in a poverty worse than slavery and white people stand at the top of an unfairly stacked pyramid of privilege. Jason D. Hill corrects the narrative in this powerfully eloquent book. Dr. Hill came to this country at the age of twenty from Jamaica and rather than being faced with intractable racial bigotry, Hill found a land of bountiful opportunity, a place where he could get a college education, earn a doctorate in philosophy, and eventually become a tenured professor at a top university, an internationally recognized scholar, and the author of several respected books in his field. Throughout his experiences, it wasn't a racist establishment that sought to keep him down. Instead, Hill recounts he faced constant naysaying from so-called liberals of all races. His academic colleagues did not celebrate the success of a black immigrant but chose to denigrate them because this particular black immigrant did not embrace their ideology of victimization. Part memoir, part exhortation to his fellow Americans, and above all, a paean to the American Dream and the magnificent country that makes it possible, *We Have Overcome* is the most important and provocative book about race relations to be published in this century.
