Contracts for Infrastructure Projects Philip Loots, Donald Charrett, 2022-05-18. *Contracts for Infrastructure Projects* An International Guide provides a guide to the law relating to construction contracts for infrastructure projects. It is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts to enable them to understand the risks involved and how to minimise them. The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars. The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment. Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain. However, where legislation impacts on the execution of construction projects or the operation of construction contracts, it may be of major importance in protecting the rights of weaker parties or third parties. It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law. To the extent possible, the emphasis is on general principles of contract law that are widely accepted in many jurisdictions. Examples are drawn from case law in a number of common law jurisdictions as well as from civil codes.

Commercial Management David Lowe, 2013-08-05. *Commercial Management* theory and practice defines the role of commercial management within project oriented organisations, providing a framework for and helping to develop a critical understanding of the factors that influence commercial management practice. It also identifies generic aspects of this practice and provides a theoretical foundation to these activities by reference to existing and emergent theories and concepts as well as to relevant management best practice. The book is structured into four parts. Part 1: Introduction. Commercial Management in Project Environments explores the nature of commercial practice within project oriented organisations at the buyer/seller interface. It presents a Commercial Management framework which illustrates the multiple interactions and connections between the purchaser's procurement cycle and a supplier's bidding and implementation cycles. Additionally, it outlines the principle activities undertaken by the commercial function, identifies the skills and abilities that support these activities, and reviews the theories and concepts that underpin commercial practice. Finally, it identifies areas of commonality of practice with other functions found within project oriented organisations, plus sources of potential conflict and misunderstanding. Part 2: Elements of Commercial Theory and Practice covers commercial leadership, exploring strategy, risk and uncertainty management, financial decision making and

key legal issues Part 3 Approaches to Commercial Practice addresses best practice management and commercial and contracting strategies and tactics Finally Part 4 Case Studies offers two extended case studies Football Stadiums the Millennium Stadium Cardiff the Emirates Stadium Islington and Wembley Stadium London and Heathrow Terminal 5 The book provides a one stop shop to the many topics that underpin commercial management practice from both a demand buy side and a supply sell side perspective It will help develop an understanding of the issues influencing commercial management leadership strategy risk financial legal best practice management and commercial and contracting strategy and tactics This book's companion website is at www.wiley.com/go/lowecommercialmanagement and offers invaluable resources for both students and lecturers PowerPoint slides for lecturers on each chapter Sample exam questions for students to practice Weblinks to key journals and relevant professional bodies
