Technology and Nationalism in India Rohit Chopra, 2008 This book examines the phenomenon of technocultural Hindu nationalism or the use of the internet by global Indian communities for the promotion of Hindu nationalist ideologies Since the introduction of Western science and technology under colonial rule in the eighteenth century science and technology have been used as instruments of transforming Indian society Scientific and technological expertise have been authorized as essential attributes of a modern Indian selfhood And the possessors of technological skills have historically been vested with the authority to speak for the nation The associations between technology and nationalism have condensed in ideas about self and other they have been incorporated in imaginings of the state and the nation and they have materialized as claims about identity community and society In the present historical moment this relationship manifests itself in one form as an online Hindu nationalism that combines cultural majoritarian claims with technological triumphalism Technocultural Hindu nationalism yokes together the core proposition of Hindu nationalist doctrine the idea that India is a Hindu nation and that religious minorities are outsiders to it with arguments about the imminent rise of Hindu India as a technological superpower in the global capitalist economy of the twenty first century Additionally while technocultural Hindu nationalism is obsessed with Western technology it also defines itself in strategic respects in opposition to Western civilization On Hindu nationalist websites this apparent paradox is resolved through the construction of a narrative where Hinduism is defined as the historical and philosophical foundation of global capitalist modernity itself and Hindus are presented as the natural heirs to that heritage This book locates these and other characteristics of Hindu nationalist identity politics in cyberspace with reference to the relationship between technology and nationalism in India from the period of British colonial rule in the mid eighteenth century to the present era of an economically and technologically interconnected world This book argues that technocultural Hindu nationalism needs to be understood in terms of the general dynamic of technology and nationalism with its continuities and discontinuities through the period of colonial rule till Indian independence in 1947 the period of Nehruvian nationalism with its emphasis on technological development in a socialist framework and the current post 1991 context following the liberalization of the Indian economy which accords pride of place to information technology and the internet This book also proposes that the

particularities of technocultural Hindu nationalism need at the same time to be assessed with reference to the modalities of online communication Toward this end the book takes shape as an interdisciplinary endeavor combining qualitative and quantitative research methodologies and drawing on historical scholarship about South Asia social and cultural theory and the sociology of new media specifically the field of internet studies Technology and Nationalism in India is an important book for all in communication Internet studies South Asian studies and postcolonial studies Political Leadership Michael Foley, 2013-11-14 Despite its recognized significance in social life leadership is a notoriously elusive subject that generates a host of different points of explanatory focus This is particularly so in the field of political leadership which has been afflicted by an enduring split between the biographical idiosyncrasies of individual leaders and the specialist contributions from an array of social science disciplines This new study is designed to establish an improved balance between this often myopic and confusing bifurcation of approaches It engages with an expansive range of empirical theoretical and interpretive research into the issue of leadership but does so in a way that ensures that the political character of the subject is kept securely in the foreground The project is therefore designed to maintain a clear emphasis upon leaders embedded in their political contexts and viscerally connected to high level issues of political location and status political power and legitimacy and political functions and contingencies The book has a cumulative design that moves from an in depth analysis of the basic components of political leadership to an examination of a series of key dimensions relating to leadership activity and development namely the themes of representation communication marketing business practice and the issue of women leaders It goes on to survey the developmental properties of the international sphere before concluding with a substantive review of the changing landscapes of contemporary leadership activity and the different ways that we come to terms with the theme of political leadership in an increasingly complex world **Far Eastern Economic Review**, 2004 **India Today** Arnold P. Kaminsky, Roger D. Long Ph.D., 2011-09-23 Containing almost 250 entries written by scholars from around the world this two volume resource provides current accurate and useful information on the politics economics society and cultures of India since 1947 With more than a billion citizens almost 18 percent of the world's population India is a reflection of over 5 000 years of interaction and exchange across a wide spectrum of cultures and civilizations India Today An Encyclopedia of Life in the Republic describes the growth and development of the nation since it achieved independence from the British Raj in 1947 The two volume work presents an analytical review of India's transition from fledgling state to the world's largest democracy and potential economic superpower Providing current data and perspective backed by historical context as appropriate the encyclopedia brings together the latest scholarship on India's diverse cultures societies religions political cultures and social and economic challenges It covers such issues as foreign relations security and economic and political developments helping readers understand India's people and appreciate the nation's importance as a political power and economic force both regionally and globally **Glittering Decades** Nayantara Pothan, 2012-01-30 New Delhi was purpose built to trumpet the

supremacy of the British Raj and inaugurated in 1931. Instead it came to represent a fading imperial dream in the two decades that followed. In the heyday of the British Raj, strict social and racial hierarchies governed the social life of the city's ruling elites. And the frivolity of New Delhi's high society was kept in check by a faithful adherence to etiquette and protocol in everyday life. For example, the sixteen-button glove at a formal viceregal dinner party was of great importance as a means of maintaining the authority of the Raj. But the 1930s and 1940s were a period of transition. The political shifts associated with India's journey to self-government echoed in the social codes of conduct adopted by the Indian elites of New Delhi and undermining the Raj's pomp became a legitimate means of challenging its authority. Closely examining the role of social ritual interaction and behaviour in the shaping of the city and its elite groups, *Glittering Decades* tells the story of New Delhi and its privileged inhabitants between 1931 and 1952. Philosophical Interventions Martha C. Nussbaum, 2012-01-02. This volume collects the notable published book reviews of Martha C. Nussbaum.
