The Curriculum of Everything: Understanding education and curriculum José Augusto Pacheco, 2023-11-06 The Curriculum of Everything advances as the eternal future in which artificial intelligence surpasses the human capacity to do but not that of understanding and feeling Now even the father of Artificial Intelligence worries even those bedrocks of being understanding and feeling may be at risk Pacheco reminds us that curriculum study is a normative question now necessarily with its technological dimension Then in a stunningly synoptic sentence that students could usefully study all semester he summarizes the curriculum as a socially culturally ideologically politically and economically constructed practice is a formal and informal dispositive of interwoven relationships between knowledge power and technology Penetrated we become impregnated with the structures of software as Pacheco appreciates Technological devices are powerful instruments of subjectivity production moving the subject into predefined ways of knowing Old fashioned rhetoric alright but insightfully implying we need to return to the past when were still sort of human before we were seduced by supranational citizenship in the software state before we became submerged in the curriculum of everything Step back from the brink Pacheco has Let us join him William F Pinar Preface Misinformation Studies and Higher Education in the Postdigital Era Paul Cook, 2024-12-15 In Misinformation Studies and Higher Education in the Postdigital Era Beyond Fake News Paul Cook argues that the epistemological complexity of the postdigital age demands a new metadisciplinary approach to information and media misinformation studies Cook posits that institutions of higher education can work toward regaining the public s trust and reinvigorating general education programs by developing a metadiscipline that directly addresses the problem of misinformation in all its various and dangerous forms This book outlines how such a curricular pivot may be accomplished in an age saturated with generative AI algorithmic manipulation ubiquitous networked computing and information overload coupled with the myriad challenges higher education faces from seemingly all sides Ultimately this book makes a compelling case that universities and colleges can instead harness the fragmentation caused by this perfect

storm currently facing higher education so they can not only weather the crisis but also emerge stronger because of it

The Public Service Media and Public Service Internet Manifesto Christian Fuchs,Klaus Unterberger,2021-09-07 This book presents the collectively authored Public Service Media and Public Service Internet Manifesto and accompanying materials The Internet and the media landscape are broken The dominant commercial Internet platforms endanger democracy They have created a communications landscape overwhelmed by surveillance advertising fake news hate speech conspiracy theories and algorithmic politics Commercial Internet platforms have harmed citizens users everyday life and society Democracy and digital democracy require Public Service Media A democracy enhancing Internet requires Public Service Media becoming Public Service Internet platforms an Internet of the public by the public and for the public an Internet that advances instead of threatens democracy and the public sphere The Public Service Internet is based on Internet platforms operated by a variety of Public Service Media taking the public service remit into the digital age The Public Service Internet provides opportunities for public debate participation and the advancement of social cohesion Accompanying the Manifesto are materials that informed its creation Christian Fuchs report of the results of the Public Service Media Internet Survey the written version of Graham Murdock s online talk on public service media today and a summary of an ecomitee com discussion of the Manifesto s foundations
