Uyarra, Jacob Carstensen, Marianna Mea, 2017-03-22 Marine management

requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money, and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal, and management mechanisms to ensure that the use of such benefits does not impact on environmental quality but instead supports its sustainable use.

A Companion to Media Fandom and Fan Studies Paul Booth, 2018-02-26. *A Companion to Media Fandom and Fan Studies* offers scholars and fans an accessible and engaging resource for understanding the rapidly expanding field of fan studies. International in scope and written by a team that includes many major scholars, this volume features over thirty especially commissioned essays on a variety of topics which together provide an unparalleled overview of this fast-growing field. Separated into five sections: Histories, Genealogies, Methodologies, Fan Practices, Fandom and Cultural Studies, Digital Fandom, and The Future of Fan Studies, the book synthesizes literature surrounding important theories, debates, and issues within the field of fan studies. It also traces and explains the social, historical, political, commercial, ethical, and creative dimensions of fandom and fan studies. Exploring both the historical and the contemporary fan situation, the volume presents fandom and fan studies as models of 21st-century production and consumption and identifies the emergent trends in this unique field of study.
