Cross-X Joe Miller,2007-10-02 In Cross X journalist Joe Miller follows the Kansas City Central High School s debate squad through the 2002 season that ends with a top ten finish at the national championships in Atlanta By almost all measures Central is just another failing inner city school

Ninety nine percent of the students are minorities Only one in three graduate Test scores are so low that Missouri bureaucrats have declared the school academically deficient But week after week a crew of Central kids heads off to debate tournaments in suburbs across the Midwest and South where they routinely beat teams from top ranked schools In a game of fast talking wit and sheer brilliance these students close the achievement gap between black and white students an accomplishment that educators and policy makers across the country have been striving toward for years Here is the riveting and poignant story of four debaters and their coach as they battle formidable opponents from elite prep schools bureaucrats who seem maddeningly determined to hold them back friends and family who are mired in poverty and drug addiction and perhaps most daunting their own self destructive choices In the end Miller finds himself on a campaign to change debate itself certain that these students from the Eastside of Kansas City may be the saviors of a game that is intrinsic to American democracy

Mind Metrics Umema Zafar, 2025-07-30 Brain health as opposed to mental health is a neglected phenomenon less discovered but now capturing more attention Currently the concepts surrounding brain health are vague and no clear definition of this term exists Assessing brain health early in life may offer insights into impending disruptions in brain function If deteriorating or poor health of the brain is detected at a young age therapeutic steps can be taken The definition of brain health is the preservation of optimal brain integrity and mental and cognitive function at a given age in the absence of overt brain diseases that affect normal brain function Recently cognitive age has been used as a better indicator of brain health called the cognitive clock This book reviews for example fMRI EEG and PET scans as well as measuring certain blood and CSF biomarker levels A new noninvasive cost effective and easily implemented

tool for gauging brain health is introduced This tool can be used in rural communities as well as in low and middle income countries LMIC This book focuses on the development of this new tool for brain health measurement as well as its cross validation in diseased and healthy populations
