Making the Case Robert Leventhal, 2019-11-18 One hundred years before Freud's striking psychoanalytic case histories the narrative psychological case history emerged in the second half of the eighteenth century in Germany as an epistemic genre Gianna Pomata that cut across the disciplines of medicine philosophy law psychology anthropology and literature It differed significantly from its predecessors in theology jurisprudence and medicine Rather than subsuming the individual under an established classification moral precept category or type the narrative psychological case history endeavored to articulate the individual in its very individuality thereby constructing a self in its irreducible singularity The presentation and analysis of several significant psychological case histories their theory and practice as well as the controversies surrounding their utility validity and function for an envisioned science of the soul constitutes the core of the book Close and distant F Moretti readings of key texts and figures in the discussion regarding empirical psychology psychologia empirica experiential psychology Erfahrungsseelenkunde and medical psychology medizinische Psychologie such as Christian Wolff J C Kr ger J C Bolton Ernst Nicolai J A Unzer J G Sulzer J G Herder Friedrich Schiller Jacob Friedrich Abel Marcus Herz Karl Philipp Moritz J C Reil Ernst Platner and Immanuel Kant provide the disciplinary historical scientific context within which this genre comes to the fore As the first systematic argument concerning the early history of this genre my thesis is that the psychological case history evolved as part of a pastoral apparatus of care concern guidance and direction for what it fashioned as the unique individual as the discursive medium in a process by which the soul became a self The narrative psychological case history was in fact a meta genre that transcended traditional boundaries of history and fiction medicine and philosophy psychology and anthropology and sought for the first time to explicitly link the experience history memory fantasy previous trauma or suffering of a unique individual to illness deviance aberration and crime In a word it demonstrated as Freud later said of his own case histories in *Studies on Hysteria* the intimate relation between the history of suffering and the symptoms of illness die innige Beziehung zwischen Leidensgeschichte und Krankheitssymptome This genre not only had a profound and far reaching effect on the evolution of German and European literature one thinks of the rich traditions of the Novella and the Fallgeschichte from Goethe B chner R L Stevenson Edgar Allen Poe and Chekhov to Kafka and beyond but in shaping modern literature the clinical sciences and even popular culture The book should therefore be of interest not merely to Germanists modern European cultural historians historians of science and literary historians but also those interested in the history of medicine and psychology the origins of psychoanalysis the history of anthropology cultural studies and more generally the history of ideas

Wenn ich das hier nunmehr in zweiter Auflage erscheinende Werk *Radioaktive Isotope in Physiologie Diagnostik und Therapie* durchblättere dann berkommt mich ein Staunen fast auch eine gewisse Bedrückung. Ich sehe was aus einem noch vor 50 Jahren in den Kinderschuhen steckenden Wissenschaftsgebiet heute geworden ist. Als ich mich 1906 auf Vorschlag von Sir WILLIAM RAMSAY in London entschloß mich ganz dem Gebiete der Radioaktivität zu widmen da habe ich um die Literatur gut kennenzulernen einige Jahre lang alle in das Gebiet fallenden Arbeiten für eine Zeitschrift allein referiert. Nachdem Dr. LISE MEITNER sich zu gemeinsamer Arbeit mit mir verbunden hatte referierten wir zusammen mehrere Jahre lang alle neu erscheinenden Arbeiten, sie die physikalischen, die chemischen. Das war damals noch möglich. Ein entscheidender Fortschritt war 1910 die Aufstellung des Begriffs der Isotopie durch FREDERICK SODDY und ein paar Jahre später die Ausnutzung der gleichen chemischen Eigenschaften isotoper Atomarten für physikalisch-chemische und chemische Probleme, die Indikatorenmethode von v. HEVESY und PANETH. Damals konnten L. MEITNER und ich noch die ganze Literatur überblicken und etwas darüber sagen. *International Review of the Science and Practice of Agriculture*, 1926 **Directory of Professional Workers in State Agricultural Experiment Stations and Other Cooperating State Institutions**, 1987

Natural Language Processing and Information Systems Helmut Horacek, Elisabeth Metais, Rafael Munoz, Magdalena Wolska, 2010-04-20. This book constitutes the thoroughly refereed post-conference proceedings of the 14th International Conference on Applications of Natural Language to Information Systems NLDB 2009 held in Saarbrücken, Germany, in June 2009. **Experiment Station Record** United States. Office of Experiment Stations, 1922 **Galen and the Early Moderns** Matteo Favaretti Camposampiero, Emanuela Scribano, 2022-03-07. This book explores the presence of Galen of Pergamon (129 c. 216 AD) in early modern philosophy, science and medicine. After a short revival due to the humanistic rediscovery of his works, the influence of the great ancient physician on Western thought seemed to decline rapidly as new discoveries made his anatomy, physiology and therapeutics more and more obsolete. In fact, even though Galenism was gradually dismissed as a system, several of his ideas spread through the modern world and left their mark on natural philosophy, rational theology, teleology, physiology, biology, botany and the philosophy of medicine. Without Galen, none of these modern disciplines would have been the same. Linking Renaissance with the Enlightenment, the eleven chapters of this book

offer a unique and detailed survey of both scientific and philosophical Galenisms from the sixteenth to the late eighteenth century Figures discussed include Julius Caesar Scaliger Giambattista Da Monte Hyeronimus Fabricius ab Aquapendente Andrea Cesalpino Thomas Browne Kenelm Digby Henry More Ralph Cudworth Robert Boyle John Locke Guillaume Lamy Jean Baptiste Verduc Gottfried Wilhelm Leibniz Christian Wolff Julien Offray de La Mettrie Denis Diderot and Kurt Sprengel
