to build grant writing skills Drawing from interviews with 100 grant writers program officers administrators writers and researchers in every phase of their career the Grant Writing Guide lays out best practices common questions and pitfalls to avoid Important topics covered will include finding available grants generating ideas aligned with one's values furthering one's career goals creating effective pitches talking to program officers completing grant applications and structuring timelines communicating clearly in prose and images and soliciting feedback to strengthen your proposal Chapters will open with stories from successful grant writers about the skill Chapters will then describe and teach the skill Chapters will end with an exercise designed to help researchers develop the skill While this book is intended specifically for academics Dr Lai has strived to incorporate advice and examples that will resonate with women as well as scholars from non traditional

Gestures of Concern Chris Ingraham, 2020-07-27 In *Gestures of Concern* Chris Ingraham shows that while gestures such as sending a Get Well card may not be instrumentally effective they do exert an intrinsically affective force on a field of social relations From liking sharing posting or swiping to watching a TED Talk or wearing an I Voted sticker such gestures operate as much through affective registers as they do through overt symbolic action Ingraham demonstrates that gestures of concern are central to establishing the necessary conditions for larger social or political change because they give the everyday aesthetic and rhetorical practices of public life the capacity to attain some socially legible momentum Rather than supporting the notion that vociferous public communication is the best means for political and social change Ingraham advances the idea that concerned gestures can help to build the affective communities that orient us to one another with an imaginable future in mind Ultimately he shows how acts that many may consider trivial or banal are integral to establishing those background conditions capable of fostering more inclusive social or political change

Mediation and Multimodal Meaning Making in Digital Environments Ilaria Moschini, Maria Grazia Sindoni, 2021-11-15 This collection explores the mediation of a wide range of processes texts and practices in contemporary digital environments through the lens of a multimodal theory of communication Bringing together contributions from renowned scholars in the field the book builds on the notion that any form of digital communication inherently presents a rich combination of different semiotic modes and resources as a jumping off point from which to critically reflect on digital mediation from three different perspectives The first section looks at social and semiotic practices and the implications of their mediation on artistic production cultural heritage and commerce The second part of the volume focuses on dynamics of awareness cognition and identity formation in participants to digitally mediated communicative processes The book's final section considers the impact of mediation on shaping new and different types of textualities and genres in digital spaces The book will be of particular interest to scholars researchers and students in multimodality digital communication social semiotics and media studies

Advancing Recommender Systems with Graph Convolutional Networks Fan Liu, Liqiang Nie, 2025-03-29 This book systematically examines scalability and effectiveness challenges related to the application of graph convolutional

networks GCNs in recommender systems By effectively modeling graph structures GCNs excel in capturing high order relationships between users and items enabling the creation of enriched and expressive representations The book focuses on two overarching problem categories the first area deals with problems specific to GCN based recommendation models including over smoothing noisy neighboring nodes and interpretability limitations The second one encompasses broader challenges in recommendation systems that GCN based methods are particularly well suited to address as the attribute missing problem or feature misalignment Through rigorous exploration of these challenges this book presents innovative GCN based solutions to push the boundaries of recommender system design To this end techniques such as interest aware message passing strategy cluster based collaborative filtering semantic aspects extraction attribute aware attention mechanisms and light graph transformer are presented Each chapter combines theoretical insights with practical implementations and experimental validation offering a comprehensive resource for researchers advanced professionals and graduate students alike
