world's most powerful companies Foxconn and Apple. As the leading manufacturer of iPhones, iPads, and Kindles and employing one million workers in China alone, Taiwanese investor Foxconn's drive to dominate global electronics manufacturing has aligned perfectly with China's goal of becoming the world leader in technology. This book reveals the human cost of that ambition and what our demands for the newest and best technology means for workers. Foxconn workers have repeatedly demonstrated their power to strike at key nodes of transnational production, challenge management, and the Chinese state, and confront global tech behemoths. Dying for an iPhone allows us to assess the impact of global capitalism's deepening crisis on workers.

The Second History of Man John Bershof, MD, 2024-05-16. In the spirit of medieval writer Chaucer, all human activity lies within the artist's scope. The History of Man Series uses medicine as a jumping-off point to explore precisely that: all history, all science, all human activity since the beginning of time. The jumping-off style of writing takes the reader, the listener into worlds unknown, always returning to base only to jump off again. History of Man are stories and tales of nearly everything. The Second History of Man focuses mostly on bacteria and bacterial infections as the foundation, jumping off into Darwin and evolution, gin tonics, and the discovery of the first antibiotic to treat infection, and it wasn't penicillin visiting with those clever chaps who cook up drugs in the lab. We'll call upon poets, poetry, celebrities like Frank Sinatra, the Rat Pack, and Bobby Darin, the classical music of Haydn, Mozart, and Beethoven, the tragic story of World War II, Anne Frank, and the Holocaust, tuberculosis, and a few of the rich famous who suffered from TB, travelling back in time to the Black Death, which wiped out 25 percent of humans on Earth, exploring the origins of a salon and a saloon, Columbus, and the Age of Discovery, the lost generations of childhood ending with the invention of the Internet.

Seeing Social Problems Ira Silver, 2024-10-14. Within the last four years, the death of George Floyd brought a new level of urgency to understanding police violence; the world experienced two of the three hottest years on record; drug overdose deaths in the U.S. surpassed 100,000 per year for the first time; the foreign-born percentage of the population became the highest ever; and COVID-19 transformed education, work, and public health. Seeing Social Problems: The Hidden Stories Behind Contemporary

Issues Second Edition shows students how to think about social problems in a new way by exploring the connection between their own experiences and larger social forces. The personal relevance of this book's content is at the forefront of every discussion. Chapters engage students in thinking about the world sociologically by focusing on case studies that represent broader social problems. In each chapter, learning objectives attune students to important concepts. Two sets of discussion questions, First Impressions and What Do You Know Now, encourage students to recognize how the chapter has broadened their perspectives. An exploration of social policy at the end of each chapter shows students that how someone understands an issue influences the ways they go about addressing it. New to the Second Edition: New chapter LGBTQ People and Their Critics explores different ways of understanding growing diversity in American society based on gender identity and sexual orientation. New chapter Education and Upward Mobility encourages readers to think more expansively about their schooling experiences starting when they were very young and continuing through college. New chapter Immigration and Border Security exposes competing ways of seeing the rising influx of migrants entering the U.S. from Mexico. New chapter Health and the Environment draws on discussion about familiar topics including Covid-19, obesity, and climate change. New chapter Technology and Instant Pleasure motivates students to recognize the wider societal impacts of their frequent usage of mobile devices to make life more convenient.

Social - Local - Mobile Gerrit Heinemann, Christian Gaiser, 2014-11-20 In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the SoLoMo synergies that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market-based case of KaufDA, a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.
