overspending **Facebook Nation** Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama in his 2011 State of the Union Address called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer Steven VanRoekel opines that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness, a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that Facebook is the most appalling spying machine that has ever been invented. Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government, and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple Wood and Facebook ROI experts Dennis Yu and Alex Houq.

The Materiality of Narrative Dynamics Stefan Iversen, Evan Van Tassell, 2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research, but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts. This volume seeks to remedy this by asking questions such as: How might the affordances of new media guide audience reception in subtle ways? How might the dynamism of legacy media be better recognized when examined through a multimedial lens? How do the physical processes of production define the horizons of both authorial activity and audience response? The insight that drives these investigations is two-fold: first, that functions and effects of narratives are deeply intertwined with material forces of production, distribution, and reception; and second, that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time. The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas. In doing so, they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled.

[The Internet of Us](#) Michael P. Lynch, 2016-03-17 An intelligent book that struggles honestly with important questions: Is the net turning us into passive knowers? Is it degrading our ability to reason? What can we do about this? David Weinberger, Los Angeles Review of Books. We used to say seeing is believing; now googling is believing. With 24/7 access to nearly all of the world's information at our fingertips, we no longer trek to the library or the encyclopedia shelf in search of answers. We just open our browsers, type in a few keywords, and wait for the information to come to us. Now firmly established as a pioneering work of modern philosophy, *The Internet of Us* has helped revolutionize our understanding of what it means to be human in the digital age. Indeed, demonstrating that

knowledge based on reason plays an essential role in society and that there is more to knowing than just acquiring information leading philosopher Michael P Lynch shows how our digital way of life makes us value some ways of processing information over others and thus risks distorting the greatest traits of mankind Charting a path from Plato's cave to Google Glass the result is a necessary guide on how to navigate the philosophical quagmire that is the Internet of Things
