The Encyclopedia of Best Films Jay Robert Nash, 2019-10-23 This all inclusive A Z encyclopedia by one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5 000 three to five star entries: three stars good, four stars excellent, five stars masterpiece, and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre: i.e. animated, drama, sports, mystery, adventure, etc. as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

Predicting Movie Success at the Box Office Barrie Gunter, 2018-02-20 This book explores the different factors that can influence a new movie's prospects at the box office. Looking at factors such as the production budget, distribution model, genre, stars, and audience reactions of films, Gunter asks how such aspects may reduce the uncertainties of success so common in the movie industry. The reader is taken on a journey through filmmaking factors that research suggests impact box office performance. While box office revenues represent only part of a movie's earning potential, Gunter highlights how theatrical performances remain central to what the movie business is about. The chapters illustrate how ticket sales are largely influenced by the production budget but also cultural differences and new movie platforms.

What Price Fame? Tyler Cowen, 2000 In a world where more people know who Princess Di was than who their own senators are, where Graceland draws more visitors per year than the White House, and where Michael Jordan is an industry unto himself, fame and celebrity are central currencies. In this intriguing book, Tyler Cowen explores and elucidates the economics of fame. Fame motivates the talented and draws like-minded fans together. But it also may put profitability ahead of quality, visibility above subtlety, and privacy out of reach. The separation of fame and merit is one of the central dilemmas.

Cowen considers in his account of the modern market economy He shows how fame is produced outlines the principles that govern who becomes famous and why and discusses whether fame seeking behavior harmonizes individual and social interests or corrupts social discourse and degrades culture Most pertinently Cowen considers the implications of modern fame for creativity privacy and morality Where critics from Plato to Allan Bloom have decried the quest for fame Cowen takes a more pragmatic optimistic view He identifies the benefits of a fame intensive society and makes a persuasive case that however bad fame may turn out to be for the famous it is generally good for society and culture
