Smart Money Brunello Rosa, Casey Larsen, 2024-10-24. A FINANCIAL TIMES ECONOMICS BOOK OF THE YEAR. An excellent book. VINCE CABLE: A must-read. JO JOHNSON: A fascinating read. BILL DUDLEY: A timely manifesto on how digital currencies will win the New Cold War and the struggle for geopolitical supremacy in the twenty-first century. A New Cold War is underway. Whereas the first Cold War was dominated by the threat of nuclear conflict, the new front line is economic and financial but still dominated by technology. Who controls its future will help decide the outcome of the geopolitical struggle between China and the US. Since the end of the Second World War, the US dollar has been the global reserve currency, which has ensured American dominance of the world economy. But no longer. More than a hundred countries are developing Central Bank Digital Currencies (CBDCs), digital equivalents to cash that will utterly transform how we do business at home and abroad. China was the first country to recognise the

potential of this new money The West's media focused on the new currency's role in China's surveillance state creating widespread concern about all CBDCs But they have largely overlooked a more important aspect of its existence as a tool through which to de-dollarise the developing world at the speed of light When China's President Xi Jinping officially launched the digital yuan in February 2022 he also agreed a pact of limitless co-operation with Russia Within days Russia launched its war on Ukraine secure in the knowledge it could bypass US sanctions Urgent clear-eyed and groundbreaking Smart Money shows us how CBDCs are going to impact all of our futures in ways that most of us have failed to even consider If the West is to compete it needs to act fast to develop its own global digital currencies that reflect the values of liberal democracies
