Autonomous Sensor Networks Daniel Filippini,2012-11-27 This volume surveys recent research on autonomous sensor

networks from the perspective of enabling technologies that support medical environmental and military applications State of the art as well as emerging concepts in wireless sensor networks body area networks and ambient assisted living introduce the reader to the field while subsequent chapters deal in depth with established and related technologies which render their implementation possible These range from smart textiles and printed electronic devices to implanted devices and specialized packaging including the most relevant technological features The last four chapters are devoted to customization implementation difficulties and outlook for these technologies in specific applications

Biopsychosocial Factors of Stress, and Mindfulness for Stress Reduction Holly Hazlett-Stevens, 2022-02-14 This volume brings together basic research on the nature of stress reactivity with up to date research on the effectiveness and mechanisms of mindfulness interventions The chapters review the major research areas that elucidate the impact of stress reactivity on health and explore the mechanisms and effectiveness of mindfulness based approaches for stress reduction and improved physical and emotional health The first section examines biopsychosocial mechanisms of stress reactivity such as allostasis and allostatic load neurobiology of stress biology of the fight or flight and tend and befriend responses and psychoneuroimmunology This section concludes by addressing the roles of perception and appraisal including the role of perceived threat in stress reactivity as well as the role that negative perceptions of the stress response itself play in compromising health The second section opens with review of leading psychological models of mindfulness including self regulation reperiencing and the Intention Attention Attitude IAA triaxiomatic model Subsequent chapters discuss mindfulness based interventions and mechanisms of change for stress and related clinical conditions including chronic pain traumatic stress anxiety and related disorders and clinical depression The final chapter reviews possible neural networks and brain mechanisms associated with mindfulness meditation practice As the research on stress reactivity and mindfulness based stress reduction continues to proliferate this book offers readers a single volume covering the most relevant information across this vast terrain Other available volumes offer in depth coverage of stress research with little mention of mindfulness and stress reduction

Conversely many texts on the topic of mindfulness and mindfulness based interventions do not adequately cover the biopsychosocial processes of stress reactivity
