The Abundant University Michael D. Smith, 2023-09-19 Why our current system of

higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of

digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity

in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social

injustice and socioeconomic stratification across the globe In *The Abundant University* Michael D Smith argues that the only

way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling

instructing and credentialing students the same technologies that we have seen create abundance in access to resources in

industry after industry *The Abundant University* explains how we got our current system why it s such an expensive

inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital

technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital

learning platforms While acknowledging the understandable self preservation instinct of our current system of residential

education Smith makes a case for how technology can engender greater educational opportunity and create changes that will

benefit students employers and society as a whole
