Deeper than Reason Jenefer Robinson, 2005-04-07 Deeper than Reason takes the insights of modern psychological and neuroscientific research on the emotions and brings them to bear on questions about our emotional involvement with the arts Robinson begins by laying out a theory of emotion one that is supported by the best evidence from current empirical work on emotions and then in the light of this theory examines some of the ways in which the emotions function in the arts Written in a clear and engaging style her book will make fascinating reading for anyone who is interested in the emotions and how they work as well as anyone engaged with the arts and aesthetics especially with questions about emotional expression in the arts emotional experience of art forms and more generally artistic interpretation Part One develops a theory of emotions as processes having at their core non cognitive instinctive appraisals deeper than reason which automatically induce physiological changes and action tendencies and which then give way to cognitive monitoring of the situation Part Two examines the role of the emotions in understanding literature especially the great realistic novels of the nineteenth century Robinson argues that such works need to be experienced emotionally if they are to be properly understood A detailed reading of Edith Wharton's novel The Reef demonstrates how a great novel can educate us emotionally by first evoking instinctive emotional responses and then getting us to cognitively monitor and reflect upon them Part Three puts forward a new Romantic theory of emotional expression in the arts Part Four deals with music both the emotional expression of emotion in music whether vocal or instrumental and the arousal of emotion by music The way music arouses emotion lends indirect support to the theory of emotion outlined in Part One While grounded in the science of emotion Deeper than Reason demonstrates the continuing importance of the arts and humanities to our lives Music in Biblical Life Jonathan L. Treating the New Anxiety Kirk A. Bingaman, 2007-09-16 A new form of anxiety has emerged stemming in part from our post 9 11 reality but even more stemming from the influence of supermodernity Whereas postmodernism theorizes an anxiety that results from the collapse or loss of meaning through the lens of supermodernity it appears that the new anxiety is evoked more by an excess of meaning generated by the rapid acceleration of human life and the media's daily bombardment with serious global national and local concerns This book explores the nature of the anxiety our supermodern condition provokes and proposes that with the void left by the diminishment of religious involvement and practice the therapy session becomes the definitive place for meaning making Building on a cognitive therapy approach that emphasizes the client's belief system Bingaman demonstrates that to treat this new anxiety most effectively practitioners must help clients identify and explore their core theological beliefs and spiritual values

Recent Events and a Clue to Their Solution Lord Robert Montagu, 1886 *Music and the Myth of Wholeness* Tim Hodgkinson, 2016-02-12 A new theory of aesthetics and music grounded in the collision between language

and the body In this book Tim Hodgkinson proposes a theory of aesthetics and music grounded in the boundary between nature and culture within the human being His analysis discards the conventional idea of the human being as an integrated whole in favor of a rich and complex field in which incompatible kinds of information biological and cultural collide It is only when we acknowledge the clash of body and language within human identity that we can understand how art brings forth the special form of subjectivity potentially present in aesthetic experiences As a young musician Hodgkinson realized that music was in some mysterious way of itself not isolated from life but not entirely continuous with it either Drawing on his experiences as a musician composer and anthropologist Hodgkinson shows how when we listen to music a new subjectivity comes to life in ourselves The normal mode of agency is suspended and the subjectivity inscribed in the music comes toward us as a formative other to engage with But this is not our reproduction of the composer s own subjectivation when we perform our listening of the music we are sharing the formative risks taken by its maker To examine this in practice Hodgkinson looks at the work of three composers who have each claimed to stimulate a new way of listening Pierre Schaeffer John Cage and Helmut Lachenmann
