An annual marker for many, it is a holiday that can often remind us how life is not going as we'd planned. Our family relationships remain strained, our finances stretched, and our schedules stuffed with too much to do in too little time. Following the formula of her successful *Loving My Actual Life*, Alexandra Kuykendall shares with readers her own personal experiment to be completely present in her life as it is during the holiday season. Addressing the themes of Advent and Christmas, she reflects on hope, love, joy, peace, and relishing the season with practical pullouts on common Christmas stressors such as finances, schedules, and extended family. Kuykendall's signature candor helps women go easy on themselves, remember what truly matters, and find joy in their imperfect Christmases. *Conquering the Content* Robin M. With guidance on incorporating learning theory into online course content, as well as a host of templates, learning guides, and sample files, this book furnishes instructors and instructional designers with the information and tools they need to design and develop their course content to better serve online students. This second edition introduces relevance statements and time-saving tips, as well as content maps which provide a scaffold for content organization and help students anchor the topics in their memories for retrieval. Readers will gain expert insight and best practices for designing within the rapidly changing online learning environment and learn to incorporate recent advances that can improve student outcomes. Because the book is designed to focus on online teaching pedagogy, it won't go out of date as specific tools change. Distance learning is becoming the norm, but creating an online class is more complex than just posting course content on a website. *Conquering the Content* demonstrates how instructors can best revamp their course content to suit the online learning environment and provides the tools and resources instructors need to transfer their effectiveness from the classroom to the online environment. Learn how to create student-friendly navigation structures that support what is known about the brain and learning. Organize content based on priority flow and easy navigation. Create assessments that work within the parameters of an online course. Chunk information to facilitate better processing. Time is of the essence in getting a course online, but it's important that pedagogy not get lost in the crush of new content. Course design is just as critical as course content when it comes to distance learning outcomes, and *Conquering the Content* provides a holistic and practical approach to effective online course development. **Billboard**, 1997-05-03 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital events brand.
