The Future of Work and Remote Jobs

Reading Comprehension

The future of work is rapidly changing, and the way it is done is also changing. In the past, most people worked in a traditional office setting, and the work was done during the day. However, with the rise of technology, many people are now working remotely, and the work is often done at night or on weekends. This has led to a new way of thinking about work, and many people are now working in a more flexible, and often more productive, way.

Remote work has become a popular option for many people, and it is expected to continue to grow in the future. This is because remote work offers many benefits, such as the ability to work from home, which can save time and money. It also allows people to work more flexibly, and to avoid the stress of a traditional office environment. However, there are also some challenges to remote work, such as the need for a strong internet connection and the potential for isolation.

As technology continues to advance, the future of work is likely to become even more flexible and productive. This will allow people to work in a way that best suits their needs, and it will also help to create a more sustainable and inclusive workforce.

Assessing Second Language Reading Karim Sadeghi, 2021-08-25 This book investigates the issue of cloze validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well as the latest research on cloze as measures of readability, language proficiency, and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests: criterion reading tests and other cloze and reading tests in general. Two new cloze tests, i.e. reader centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers, and graduate and post graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.
