Computational Intelligence for Society 5.0 Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29 As technology rapidly advances the complexity of societal challenges grows necessitating intelligent solutions that can adapt and evolve However developing such solutions requires a deep understanding of computational intelligence CI and its application in addressing real world problems Moreover ethical considerations surrounding AI such as bias and accountability are crucial to ensure responsible development and deployment of intelligent systems Open AI and Computational Intelligence for Society 5.0 offers a comprehensive exploration of CI providing insights into intelligent systems theory design and application This book is a practical guide for scientists engineers and researchers seeking to develop thoughtful solutions for complex societal issues Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life

Empire of AI Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with

the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

LLMs in Production Christopher Brousseau, Matt Sharp, 2025-02-18 Goes beyond academic discussions deeply into the applications layer of Foundation Models This practical book offers clear example rich explanations of how LLMs work how you can interact with them and how to integrate LLMs into your own applications Find out what makes LLMs so

different from traditional software and ML discover best practices for working with them out of the lab and dodge common pitfalls with experienced advice In LLMs in Production you will Grasp the fundamentals of LLMs and the technology behind them Evaluate when to use a premade LLM and when to build your own Efficiently scale up an ML platform to handle the needs of LLMs Train LLM foundation models and finetune an existing LLM Deploy LLMs to the cloud and edge devices using complex architectures like PEFT and LoRA Build applications leveraging the strengths of LLMs while mitigating their weaknesses LLMs in Production delivers vital insights into delivering MLOps so you can easily and seamlessly guide one to production usage Inside you ll find practical insights into everything from acquiring an LLM suitable training dataset building a platform and compensating for their immense size Plus tips and tricks for prompt engineering retraining and load testing handling costs and ensuring security Foreword by Joe Reis About the technology Most business software is developed and improved iteratively and can change significantly even after deployment By contrast because LLMs are expensive to create and difficult to modify they require meticulous upfront planning exacting data standards and carefully executed technical implementation Integrating LLMs into production products impacts every aspect of your operations plan including the application lifecycle data pipeline compute cost security and more Get it wrong and you may have a costly failure on your hands About the book LLMs in Production teaches you how to develop an LLMOps plan that can take an AI app smoothly from design to delivery You ll learn techniques for preparing an LLM dataset cost efficient training hacks like LORA and RLHF and industry benchmarks for model evaluation Along the way you ll put your new skills to use in three exciting example projects creating and training a custom LLM building a VSCode AI coding extension and deploying a small model to a Raspberry Pi What s inside Balancing cost and performance Retraining and load testing Optimizing models for commodity hardware Deploying on a Kubernetes cluster About the reader For data scientists and ML engineers who know Python and the basics of cloud deployment About the author Christopher Brousseau and Matt Sharp are experienced engineers who have led numerous successful large scale LLM deployments

Azure AI Fundamentals (AI-900) Study Guide Tom

Taulli,2025-05-06 Businesses that want to stay competitive know that AI has become a crucial technology and so do their employees looking to grow their careers Earning Microsoft s AI 900 Azure AI Fundamentals certification proves your proficiency with foundational AI concepts This study guide equips you with the knowledge needed to pass the AI 900 exam whether you re an IT professional a data analyst or a student looking to break into the AI field Packed with clear explanations real world examples exam tips and practice questions this comprehensive handbook is your go to resource for mastering the Azure AI platform and advancing your career You ll explore key exam topics including machine learning computer vision and generative AI while gaining practical insights into leveraging Azure s powerful AI tools

Prompt Engineering for

Generative AI James Phoenix, Mike Taylor, 2024-05-16 Large language models LLMs and diffusion models such as ChatGPT and Stable Diffusion have unprecedented potential Because they have been trained on all the public text and images on the

internet they can make useful contributions to a wide variety of tasks And with the barrier to entry greatly reduced today practically any developer can harness LLMs and diffusion models to tackle problems previously unsuitable for automation With this book you ll gain a solid foundation in generative AI including how to apply these models in practice When first integrating LLMs and diffusion models into their workflows most developers struggle to coax reliable enough results from them to use in automated systems Authors James Phoenix and Mike Taylor show you how a set of principles called prompt engineering can enable you to work effectively with AI Learn how to empower AI to work for you This book explains The structure of the interaction chain of your program s AI model and the fine grained steps in between How AI model requests arise from transforming the application problem into a document completion problem in the model training domain The influence of LLM and diffusion model architecture and how to best interact with it How these principles apply in practice in the domains of natural language processing text and image generation and code

The Rise of Generative Artificial Intelligence Nir Kshetri,2024-12-09 This timely book explores how generative artificial intelligence GAI is developing and diffusing highlighting the diverse impacts this technology is likely to have on economies and societies It also examines the effects on and the responses of industries where GAI has been the most pervasive

Revolutionizing the Service Industry With OpenAI Models Demir, Mahmut,Dalgic, Ali,2024-04-23 The pressing challenges businesses face are rising including the ethical considerations associated with artificial intelligence AI in the service industry Revolutionizing the Service Industry with OpenAI Models is a book rooted in real world examples and expert insights which provides practical solutions by implementing the latest technology and explores the impact of AI powered conversational agents on the service sector The book commences with an enlightening introduction that underscores the transformative power of ChatGPT and OpenAI models setting the stage for a deep dive into their role in reshaping the service industry Through a systematic examination of current challenges and opportunities the text unveils the innovations brought about by ChatGPT in customer service revealing its potential to enhance response times handle complex inquiries and deliver personalized experiences on an unprecedented scale Delving into designing conversational user interfaces addressing language barriers and deploying AI in sensitive sectors like healthcare the book guides readers through responsible and effective implementation It balances the exploration of AI driven automation with understanding the importance of maintaining a human touch in service interactions This book is ideal for business owners managers and decision makers seeking to leverage AI powered conversational agents for strategic advantage Simultaneously AI enthusiasts researchers and developers will find invaluable insights into the current issues best practices and future trends in AI driven customer interactions

Technology and the Rise of Great Powers Jeffrey Ding,2024-08-20 Technological revolutions have long been understood as one of the key factors affecting the rise of great powers Yet when these dynamics have been studied the focus tends to be on the moment of innovation where was a key technology invented In this book Jeffrey Ding argues that it s not innovation but rather the way a technology diffuses through a country that determines whether and how it strengthens the state The result is a new way to consider how technology and power have played out over history and what this might mean for the future To make this case Ding first outlines a new theory that centers on not the creation of new technology but its spread across society looking specifically at the role of education in promoting technological skill and literacy He then shows how this approach changes our understanding of three canonical cases Britian s rise during the first industrial revolution America s rise during the second industrial revolution and Japan s rise and decline during the third industrial revolution He then expands out to consider what this theory would predict for the coming competition between the United States and China in an AI driven fourth industrial revolution The result is an ambitious wide ranging take on how technology shapes world order Provided by publisher

Data Labeling in Machine Learning with Python Vijaya Kumar Suda,2024-01-31 Take your data preparation machine learning and GenAI skills to the next level by learning a range of Python algorithms and tools for data labeling Key Features Generate labels for regression in

scenarios with limited training data Apply generative AI and large language models LLMs to explore and label text data Leverage Python libraries for image video and audio data analysis and data labeling Purchase of the print or Kindle book includes a free PDF eBook Book Description Data labeling is the invisible hand that guides the power of artificial intelligence and machine learning In today's data driven world mastering data labeling is not just an advantage it's a necessity Data Labeling in Machine Learning with Python empowers you to unearth value from raw data create intelligent systems and influence the course of technological evolution With this book you'll discover the art of employing summary statistics weak supervision programmatic rules and heuristics to assign labels to unlabeled training data programmatically As you progress you'll be able to enhance your datasets by mastering the intricacies of semi supervised learning and data augmentation Venturing further into the data landscape you'll immerse yourself in the annotation of image video and audio data harnessing the power of Python libraries such as seaborn matplotlib cv2 librosa openai and langchain With hands on guidance and practical examples you'll gain proficiency in annotating diverse data types effectively By the end of this book you'll have the practical expertise to programmatically label diverse data types and enhance datasets unlocking the full potential of your data What you will learn Excel in exploratory data analysis EDA for tabular text audio video and image data Understand how to use Python libraries to apply rules to label raw data Discover data augmentation techniques for adding classification labels Leverage K means clustering to classify unsupervised data Explore how hybrid supervised learning is applied to add labels for classification Master text data classification with generative AI Detect objects and classify images with OpenCV and YOLO Uncover a range of techniques and resources for data annotation Who this book is for This book is for machine learning engineers data scientists and data engineers who want to learn data labeling methods and algorithms for model training Data enthusiasts and Python developers will be able to use this book to learn data exploration and annotation using Python libraries Basic Python knowledge is beneficial but not necessary to get started

Developing Apps with GPT-4 and ChatGPT
Olivier Caelen, Marie-Alice Blete, 2024-07-10 This book provides an ideal guide for Python developers who want to learn how to build applications with large language models Authors Olivier Caelen and Marie Alice Blete cover the main features and benefits of GPT 4 and GPT 3.5 models and explain how they work You'll also get a step by step guide for developing applications using the OpenAI Python library including text generation Q & A and smart assistants Written in clear and concise language *Developing Apps with GPT 4 and ChatGPT* includes easy to follow examples to help you understand and apply the concepts to your projects Python code examples are available in a GitHub repository and the book includes a glossary of key terms Ready to harness the power of large language models in your applications This book is a must You'll learn Fundamentals and benefits of GPT 4 and GPT 3.5 models including the main features and how they work How to integrate these models into Python based applications leveraging natural language processing capabilities and overcoming specific LLM related challenges Examples of applications demonstrating the OpenAI API in Python for tasks including text generation
