programs are an effective way to work collaboratively towards a common threat reduction goal usually with a strong focus on strengthening health systems and making the world a safer place Cooperative programs are built upon trust and sharing of information and resources to increase the capacity and capabilities of partner countries Biological engagement programs reduce the threat of infectious disease with a focus on pathogens of security concern such as those pathogens identified by the U S Government as Biological Select Agent and Toxins These programs seek to develop technical or scientific relationships between countries to combat infectious diseases both in humans and animals Through laboratory biorisk management diagnostics pathogen detection biosurveillance and countermeasure development for infectious diseases deep relationships are fostered between countries Biological engagement programs are designed to address dual use issues in pathogen research by promoting responsible science methodologies and cultures Scientific collaboration is a core mechanism for engagement programs are designed to strengthen global health security including prevention of avoidable epidemics detection of threats as early as possible and rapid and effective outbreak response This Research Topic discusses Biological Engagement Programs highlighting the successes and challenges of these cooperative programs Articles in this topic outlined established engagement programs as well as described what has been learned from historical cooperative engagement programs not focused on infectious diseases Articles in this topic highlighted selected research trainings and programs in Biological Engagement Programs from around the world This Topic eBook first delves into Policies and Lessons Learned then describes Initiatives in Biosafety the core of this work documents Cooperative Research Results from the field then lastly the Topic lays out potential Future Directions to the continued success of the World s cooperative science in reducing the threat of infectious diseases

Statistics for Spatio-Temporal Data Noel Cressie, Christopher K.

Wikle, 2015-11-02 Winner of the 2013 DeGroot Prize A state of the art presentation of spatio temporal processes bridging classic ideas with modern hierarchical statistical modeling concepts and the latest computational methods Noel Cressie and Christopher K Wikle are also winners of the 2011 PROSE Award in the Mathematics category for the book Statistics for Spatio Temporal Data 2011 published by John Wiley and Sons The PROSE awards for Professional and Scholarly Excellence are given by the Association of American Publishers the national trade association of the US book publishing industry Statistics for Spatio Temporal Data has now been reprinted with small corrections to the text and the bibliography The overall content and pagination of the new printing remains the same the difference comes in the form of corrections to typographical errors editing of incomplete and missing references and some updated spatio temporal interpretations From understanding environmental processes and climate trends to developing new technologies for mapping public health data and the spread of invasive species there is a high demand for statistical analyses of data that take spatial temporal and spatio temporal information into account Statistics for Spatio Temporal Data presents a systematic approach to key quantitative techniques that incorporate the latest advances in statistical computing as well as hierarchical particularly Bayesian

statistical modeling with an emphasis on dynamical spatio temporal models Cressie and Wikle supply a unique presentation that incorporates ideas from the areas of time series and spatial statistics as well as stochastic processes Beginning with separate treatments of temporal data and spatial data the book combines these concepts to discuss spatio temporal statistical methods for understanding complex processes Topics of coverage include Exploratory methods for spatio temporal data including visualization spectral analysis empirical orthogonal function analysis and LISAs Spatio temporal covariance functions spatio temporal kriging and time series of spatial processes Development of hierarchical dynamical spatio temporal models DSTMs with discussion of linear and nonlinear DSTMs and computational algorithms for their implementation Quantifying and exploring spatio temporal variability in scientific applications including case studies based on real world environmental data Throughout the book interesting applications demonstrate the relevance of the presented concepts Vivid full color graphics emphasize the visual nature of the topic and a related FTP site contains supplementary material Statistics for Spatio Temporal Data is an excellent book for a graduate level course on spatio temporal statistics It is also a valuable reference for researchers and practitioners in the fields of applied mathematics engineering and the environmental and health sciences

The Aesthetics of Scientific Experiments Milena Ivanova,Alice Murphy,2023-06-16 The relationship between aesthetics and science has begun to generate substantial interest However for the most part the focus has been on the beauty of theories and other aspects of scientific practice have been neglected This book offers a novel perspective on aesthetics in experimentation via ten original essays from an interdisciplinary group comprised of philosophers historians of science and art and artists The collection provides an analysis of the concept of beauty in the evaluation of experiments What properties do practising experimenters value How have the aesthetic properties of scientific experiments changed over the years Secondly the volume looks at the role that aesthetic factors including negative values such as ugliness as well as experiences of the sublime and the profound play in the construction of an experiment and its reception Thirdly the chapters provide in depth historical case studies from the Royal Society which also allows for a study of the depiction of scientific experiment in artworks as well as contemporary examples from the Large Hadron Collider and cases of experiments designed by artificial intelligence Finally it offers an exploration of the commonalities between how we learn from experiments on the one hand and the cognitive value of artworks on the other The Aesthetics of Scientific Experiments will be of interest to researchers and advanced students working in philosophy and history of science philosophy and history of art as well as practising scientists and science communicators
