they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

The New Fire Ben Buchanan, Andrew Imbrie, 2024-03-05 AI is revolutionizing the world Here's how democracies can come out on top Artificial intelligence is revolutionizing the modern world It is ubiquitous in our homes and offices in the present and most certainly in the future Today we encounter AI as our distant ancestors once encountered fire If we manage AI well it will become a force for good lighting the way to many transformative inventions If we deploy it thoughtlessly it will advance beyond our control If we wield it for destruction it will fan the flames of a new kind of war one that holds democracy in the balance As AI policy experts Ben Buchanan and Andrew Imbrie show in *The New Fire* few choices are more urgent or more fascinating than how we harness this technology and for what purpose The new fire has three sparks data algorithms and computing power These components fuel viral disinformation campaigns new hacking tools and military weapons that once seemed like science fiction To autocrats AI offers the prospect of centralized control at home and asymmetric advantages in combat It is easy to assume that democracies bound by ethical constraints and disjointed in their approach will be unable to keep up But such a dystopia is hardly preordained Combining an incisive understanding of technology with shrewd geopolitical analysis Buchanan and Imbrie show how AI can work for democracy With the right approach technology need not favor tyranny
