Reason to Return Ericka Andersen, 2023-01-17 Do you really need church to have a relationship with God Church can produce all kinds of automatic reactions depending on your past experiences Perhaps your family was actively involved in church or maybe your experience was limited to attending on the occasional holiday Is it a place you associate with feelings

of shame or joy Does it bring anxiety or do you have fond memories Few people are neutral on the subject of church Are you one of the 16 million American women who have left the church in the last decade There are many reasons for this exodus Many women who leave the church especially those who still consider themselves to be Christians desire a closer relationship with God and a deeper spiritual life What they may not realize is that the imperfect churches of their pasts might be keeping them from meeting those deep spiritual longings today In Reason to Return Ericka Andersen delves into the reasons why women are leaving church in droves With gentle insight and thoughtful research she invites Christian women who are hurt or disillusioned by the churches of their pasts to fulfill their unmet spiritual longings for God and community and consider what the church might still have to offer them

The Dynamics of Asian Economic Development Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world s attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China s Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China s BRI has prompted the investment competition between Japan and the US which has

made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China
