Microeconomics John P. Burkett, 2006-04-20 In this book John P Burkett presents microeconomics as an evolving science interacting with mathematics psychology and other disciplines and offering solutions to a growing range of practical problems The book shows how early contributors such as Xenophon Ibn Khaldun and David Hume posed the normative and positive questions central to microeconomics It expounds constrained optimization techniques as developed by economists and mathematicians from Daniel Bernoulli to Leonid Kantorovich emphasizing their value in deriving norms of rational behavior and testable hypotheses about typical behavior Applying these techniques the book introduces partial equilibrium analysis of particular markets and general equilibrium analysis of market economies The book both explains how laboratory and field experiments are used in testing economic hypotheses and provides materials for classroom experiments It gives extensive and innovative coverage of recent findings in cognitive psychology and behavioral economics which not only document behavior inconsistent with some traditional theories but also advance positive theories with superior predictive power

Health Economics, second edition Frank A. Sloan, Chee-Ruey Hsieh, 2017-01-20 The new edition of a textbook that combines economic concepts with empirical evidence updated with material on the Affordable Care Act and other developments This book introduces students to the growing research field of health economics Rather than offer details about health systems without providing a theoretical context Health Economics combines economic concepts with empirical evidence to enhance readers economic understanding of how health care institutions and markets function The theoretical and empirical approaches draw heavily on the general field of applied microeconomics but the text moves from the individual and firm level to the market level to a macroeconomic view of the role of health and health care within the economy as a whole The book takes a global perspective with description and analysis of institutional features of health sectors in countries around the world This second edition has been updated to include material on the U S Patient Protection and Affordable Care Act material on the expansion of health insurance in Massachusetts and an evaluation of Oregon s Medicaid expansion via lottery The discussion of health care and health insurance in China has been substantially revised to reflect widespread changes there Tables and figures have been updated with newly available data Also new to this edition is a discussion of the health economics literature published between 2010 and 2015 The text includes readings extensive references review and discussion questions and exercises A student solutions manual offers solutions to selected exercises Downloadable
