MTA Microsoft Technology Associate Exam 98-374 Gaming Development Fundamentals Exam
FOCUS Study Notes and Review Questions 2013 Exam REVIEW, 2013-08-09 The Microsoft Technology Associate (MTA) certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist (MCTS) or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP, or MCPD certifications. The MTA certification focuses more on knowledge and a little less on skills. There are several objectives covered in the gaming development exam, including Game Design, Hardware, Graphics, and Animation. For the exam, programming language is not an issue. It is the concept behind the development effort that is important. You need to know that it is technically possible to use any .NET language to write games using XNA, but C# was the only officially supported language. However, since XNA Game Studio 4.0 Refresh, you may write code using Visual Basic. This Exam FOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.
