Queer Jewish Strangers in American Popular Culture Amy Tziporah Karp, 2023-12-19 Queer Jewish Strangers in American Popular Culture Life Between Assimilation and Otherness explores LGBTQIA Jewish American identity in the United States and the queer Jewish stranger figures who live in between incorporation and estrangement Amy Tziporah Karp establishes that despite the near ubiquitous portrayal of Jewish American assimilation as a finished project completed in the wake of World War II in academic disciplines and throughout popular culture many LGBTQIA Jewish figures in contemporary popular culture inhabit stranger positionalities In these stranger spaces characters are forced to either perpetually attempt to assimilate or inhabit this interstitial stranger identity that is often viewed as a nowhere or homeless space Those who pursue assimilating endlessly try to fit in to no avail such as Jenny Schecter from Showtime s popular The L Word who is ultimately killed off on the show possibly murdered by her LGBTQIA community of friends Karp shows that those who attempt to make a home in a stranger positionality align themselves with other estranged and othered peoples such as characters throughout Sarah Schulman s novels and that this constitutes an ethical stance against the ways in which assimilation often inadvertently supports the workings of violent hegemonies in the United States *FCC Record* United States. Internet Video Data Streaming Ye Tian,Min Zhao,Xinming Zhang,2017-10-20 This book investigates the problem of reducing operating cost for a video streaming content delivery network CDN including both the CDN s energy and traffic costs It first introduces the key issues and design choices of representative real world CDNs and discusses the energy saving techniques for data centers and CDNs Then based on a measurement study on a large video streaming CDN it reveals an

inherent conflict between improving a video streaming CDN's energy efficiency for energy saving and maintaining the CDN's ISP friendly server selection policy. Further, it discusses a cost aware capacity provisioning algorithm that not only allows the service capacity of a CDN's server clusters in numerous ISPs to be dynamically planned but also means that the overall operating cost including both the energy consumptions and the cross ISP traffics can be further optimized. In addition, it uses the workload derived from real world measurement and also implements real values of the actual power and bandwidth prices to evaluate the capacity provisioning algorithm showing that it can significantly reduce the overall operating cost of a video streaming CDN and effectively avoid frequent server switches. Lastly, the book outlines a number of potential research directions regarding cost aware content delivery. The measurement analysis and optimization methodologies and results presented in this book are of particular interest to researchers in the Internet and networking area.
