Microfranchising Nicolas Sireau, 2017-09-08. It is increasingly clear that fifty years of international development have done little to reduce poverty in Africa. Indeed, more and more academics and practitioners are highlighting the detrimental effect of traditional development as carried out by international agencies and NGOs, which often leads to dependency, inefficiency, waste and poor governance. Yet there is a new movement that is surging ahead in its attempt to reduce poverty and generate wealth in Africa: microfranchising. Set up by pioneering organizations such as VisionSpring and HealthStore, microfranchising is based on one of the most successful market based models in Western economies: franchising. From McDonald's to Coca Cola, franchising has proven itself to be an effective and replicable way of scaling up a business rapidly in the Western context. It is only recently that members of the growing body of social entrepreneurs have turned to the franchise model as one of the responses to Africa's endemic economic stagnation. And the results have been inspiring: instead of the dependency generated by traditional charity development projects, these new social capitalists have generated enterprise and self sustainability in the most challenging environments of rural Africa. This long needed book looks at the growth in microfranchising as a tool to generate wealth among poor communities in Africa. The book traces the evolution of the concept of microfranchising from its foundation in Western models to its implementation in African countries today. It provides practical steps from the world's leading experts on how to set up a microfranchise, from recruiting franchisees to building a brand and a supply chain. It gives case studies of successful microfranchises told by the enterprises themselves. It continues with a theoretical analysis of the place of microfranchising within global social entrepreneurship. It ends with a look at the future for microfranchising with recommendations for development. Edited by the former CEO of SolarAid, which created the Sunny Money microfranchise, the book provides a ground breaking set of case studies and analysis of microfranchising for development. It brings together academics and practitioners to provide context analysis and practical advice. Indeed, it provides the theory, the practical advice and the case studies to guide any entrepreneur, NGO, business or government interested in setting up their own microfranchise scheme.

Base of the Pyramid 3.0 Fernando Casado Caneque, Stuart L. Hart, 2017-09-08. For well over 4 billion people, approximately 60% of all humanity, annual income is less than 1,500. catch phrases like inclusive business opportunities for the majority sustainable livelihoods pro poor business and social business and thousands of new businesses institutions and investment funds have been set up In this ground breaking new book Stuart L Hart and Fernando Casado Ca eque have worked with members of the BoP Global Network to shake the tree look objectively at what has happened since 2002 highlight why earlier applications of BoP haven t worked and propose new objectives and ways of working to formulate more sustainable solutions The book challenges the reader and organizations to think about the mindset and purpose across whole organizations open innovation rather than simply co creation and a complete review of the innovation ecosystem Through this book practitioners will gain a clearer insight into which business models can work within different communities to ensure a sustainable transition to improved local economies Equally the book is a must read for researchers and students in the fields of entrepreneurship innovation sustainable development and environmental management

Globalization, Economic

Inclusion and African Workers Kate Meagher, Laura Mann, Maxim Bolt, 2018-10-03 This book addresses the question of whether greater inclusion in the global economy offers a solution to rising unemployment and poverty in contemporary Africa. The authors trace the connection between global demographic change and new mechanisms of economic inclusion via global value chains, digital networks, labour migration and corporate engagement with the bottom of the pyramid, challenging the claim that African workers have become functionally irrelevant to the global economy. They expose the shift of global demand for African workers from formal to increasingly informalised labour arrangements mediated by social enterprises, labour brokers, graduate entrepreneurs and grassroots associations. Focusing on global employment connections initiated from above and from below, the authors examine whether global labour linkages increase or reduce problems of vulnerable and unstable working conditions within African countries and considers the economic and political conditions needed for African workers to capture the gains of inclusion in the global economy. This book was previously published as a special issue of the *Journal of Development Studies*.

Social entrepreneurship is the practice of using the mindset, tools, techniques and processes of entrepreneurship to confront pressing social issues, an intriguing concept that American business is just beginning to understand. *Social Entrepreneurship: How Businesses Can Transform Society* brings together a group of expert contributors who offer the very latest thinking about the tremendous potential of this rapidly growing field. Unlike other books on the subject that tend to be merely descriptive and/or inspirational, this set comprises three hands-on volumes that dig deeply into the major factors that impact social entrepreneurship. Each volume addresses one of three important aspects of setting up and running a successful enterprise: legal/organizational structure, marketing and performance measurement and management. The author examines root concepts in detail and spotlights opportunities, challenges and the considerations involved in implementation. Practitioners will especially appreciate the set's practical insights and the contributors' efforts to link theory to practice in a way that facilitates effective action.
