Gender from Latin to Romance Michele Loporcaro, 2018 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard he draws on data from the Middle Ages to the present from all the Romance languages and dialects discussing examples from Romanian to Portuguese and crucially also focusing on less widely studied varieties such as Sursilvan Neapolitan and Asturian The investigation first reveals that several varieties

display more complex systems than the binary masculine feminine contrast familiar from modern French or Italian Moreover it emerges that traditional accounts whereby neuter gender was lost in the spoken Latin of the late Empire cannot be correct instead the neuter gender underwent a range of different transformations from Late Latin onwards which are responsible for the different systems that can be observed today across the Romance languages The volume provides a detailed description of many of these systems which in turns reveals a wealth of fascinating data such as varieties where husbands are feminine and others where wives are masculine dialects in which nouns overtly mark gender but only in certain syntactic contexts and one Romance variety Asturian in which it appears that grammatical gender has split into two concurrent systems The volume will appeal to linguists from a range of backgrounds including Romance linguistics historical linguistics typology and morphosyntax and is also of relevance to those working in sociology gender studies and psychology **Book News** ,1888

New York Magazine ,1989-07-17 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea Romance Languages and Linguistic Theory 2001 Josep Quer i Carbonell,2003 The volumes Romance Languages and Linguistic Theory published in the series Current Issues in Linguistic Theory contain the selected papers of the Going Romance conferences a major European annual discussion forum for theoretically relevant research on Romance languages Romance Languages and Linguistic Theory 2001 is the third such volume It presents a selection of the papers that have been presented at the occasion of Going Romance 2001 XV which was held at the University of Amsterdam on December 6 8 2001 The three day program included a workshop on Determiners The volume contains articles on specifics of one or more Romance languages or varieties the architecture of the Determiner Phrase and properties of determiners the left periphery of the sentence and clause structure null elements and their interpretation clitics and other interesting phenomena in the Romance languages The Literary News Frederick Leypoldt,1899 **New York Magazine** ,1982-12-06 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **A New and Complete Dictionary of the English and German Languages** William Odell Elwell,1849 **Manual of Romance Word Classes** Anna-Maria De Cesare,Giampaolo Salvi,2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the

current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties *Romance Objects* Giuliana Fiorentino,2011-09-08 The volume

brings together the papers read at the international conference on Romance Objects organized by the Linguistics Department of the Roma Tre University It is characterized by a striking uniformity of approach which is functional and of methodology The various case studies regarding the object focus on the syntax semantics and syntax pragmatics interfaces The common denominator of the ten enquiries is the identification of the object category the DO in particular in Romance languages at the same time some of the contributors relate the specific topic to more general questions of linguistic typology Some of the essays are based on the analysis of data from a corpus and present a diachronic picture of the evolution of the specific topic investigated Thus this volume is addressed not only to scholars interested in the Romance languages but also all those who study the object category in a cross linguistic perspective Michela Cennamo In transitivity and object marking some current issues *Masculinities in Post-Millennial Popular Romance* Eirini Arvanitaki,2022-05-12 This book focuses on the projection of the hero's masculinity in a selection of post millennial popular romance narratives and attempts to discover if and to what extent this projection reinforces or challenges patriarchal ideas about gender In the majority of these narratives the hero is often presented as a hegemonic alpha male However hegemonic masculinity is not a fixed concept Rather it is subject to continuous change which allows for the emergence of various dominant masculinities Under a poststructuralist lens and through a close textual analysis approach and a gender reading of romance narratives the book suggests that to a certain extent the romance hero could be described as a platform onto which different forms of dominant masculinity are displayed and highlights that these masculinities do not necessarily clash depend on or function as a prerequisite for each other *A new and complete dictionary of the english and german languages* Odell Elwell,1850

Current Issues in Romance Languages Teresa Satterfield,Christina Tortora,Diana Cresti,2002 This book presents an enlightening collection of papers contributing to theoretical discussions across many topics within the study of Romance Languages and Linguistics The work originates from the 29th Linguistic Symposium on Romance Languages held in 1999 at the University of Michigan Ann Arbor although only a small subpart of the proceedings papers are included in this volume The selected papers have been reworked for the current publication *Literary News* ,1883 **Variation within and across Romance Languages** Marie-Hélène Côté,Eric Mathieu,2014-12-15 This volume is a selection of twenty peer

reviewed articles first presented at the 41st annual Linguistic Symposium on Romance Languages LSRL held at the University of Ottawa in 2011 They are thematically linked by a broad notion of variation across languages dialects speakers time linguistic contexts and communicative situations Furthermore the articles address common theoretical and empirical issues from different formal experimental or corpus based perspectives The languages analyzed belong to the main members of the Romance family Spanish Portuguese Catalan French Latin Italian Sardinian and Romanian and a variety of topics across a wide spectrum of linguistic subfields from phonetics to semantics as well as historical linguistics bilingualism and second language learning is covered By illustrating the richness and complementarity of subjects methods and theoretical frameworks explored within Romance linguistics significant contributions are made to both the documentation of Romance languages and to linguistic theory
