Benuto,2012-09-19 This book focuses on diversity culture and ethnicity as they relate to psychological assessment of Hispanics It is a how to guide for clinicians researchers and instructors working with Hispanic clients Each chapter contains an overview of cultural considerations needed for assessing the Hispanic client followed by a specific exploration of the assessment measures available and the research that has been conducted on these measures with Hispanic participants

An exploration of the strengths and limitations of each assessment measure is included. Considering that ethnocultural minority individuals who are of Hispanic Latino origin make up the largest ethnocultural minority group in the United States, guidelines for working with this population are a must. Given that a large subset of this percentage is composed of immigrants many of whom do not speak English or who have learned English as a second language, special considerations for effective psychological assessment are necessary. This book fills a gap in the scientific literature by consolidating the research on psychological assessment with Hispanic samples into one comprehensive volume and providing simple recommendations for the psychological assessment of Hispanic clients. An exploration of the general psychological assessment domains e.g. personality intelligence is included with references to research on the major assessment measures used in the field. A more specific exploration of psychodiagnostic assessment measures follows including the assessment of mood disorders, anxiety disorders, sexual dysfunction, psychosis etc. Several chapters are dedicated to specialized assessment including neuropsychological assessment, forensic assessment and school based assessment, overall creating the most comprehensive up to date research based compendium of psychological assessment measures for use with Hispanic clients.

Clinical Guide to the Treatment of the Mentally Ill Homeless Person American Association of Community Psychiatrists, 2007-05-03. A case based clinical guide applicable to a variety of settings, this book offers evidence based expert advice on the difficult challenges inherent in working with underserved homeless populations. The American Association of Community Psychiatrists Clinical Guide to the Treatment of the Mentally Ill Homeless Person is a concise practical work that gives busy clinicians the information they need; it not only is more up to date than existing publications but also offers case and site based content that provides more hands on practical advice. Written by clinicians for clinicians, it offers approaches to therapy and rehabilitation from the vantage point of the treatment environment, from street to housing and everything in between. The book reflects approaches to the clinical care of homeless people refined over two decades, building not only on the work of academic research but more importantly on the firsthand experience of clinicians. Its organization by treatment setting or specific subpopulation allows readers quick access to the chapters most relevant to their work. The first five chapters follow a sequence of naturalistic settings such as shelters and the work of Assertive Community Treatment Teams that demonstrate a model of engagement, intensive care and ongoing rehabilitation. Subsequent chapters define specific scenarios that depict patients at various points on the engagement/rehabilitation continuum. Each chapter contains a clinical case example, guides to differential diagnosis, treatment planning and accessing entitlements, and a flow chart for rehabilitation including opportunities for student resident or community involvement. The book emphasizes a real world orientation that provides a nuts and bolts approach to such cases as families, homeless children, veterans, even individuals in rural settings.
