Datapolis Paul Cournet, Negar Sanaa Bensi, 2024-02-05 DATAPOLIS looks into the materiality of data, its inherent ethical and political contradictions, as well as cultural and environmental footprints, by following two main trajectories. The first one attempts to define what the cloud is and how it operates. From the systems and infrastructures behind the Internet to the apparatus, gizmos, and buildings that can transcend scales and temporal dimensions. The second one explores how data penetrates our existence, not only by affecting the ways we live and work or design and make cities, but by offering distinct ways of life and organization that otherwise would not have been possible. Through various visual and textual materials, this book speculates on the ways in which architecture can engage with data and digital technology beyond its mere instrumental use in making smart cities. DATAPOLIS is edited by Paul Cournet and Negar Sanaa Bensi. With contributions by Kees Kaan, Kate Crawford, Shannon Mattern, Ruha Benjamin, Marina Otero Verzier, and Joost Grootens. The most complete version of this work was published in 2023 by nai010.
