How College Students Succeed Nicholas A. Bowman, 2023-07-03 Receiving a college education has perhaps never been more important than it is today While its personal societal and overall economic benefits are well documented too many college students fail to complete their postsecondary education As colleges and universities are investing substantial resources into efforts to counter these attrition rates and increase retention they are mostly unaware of the robust literature on student success that is often bounded in disciplinary silos The purpose of this book is to bring together in a single volume the extensive knowledge on college student success It includes seven chapters from authors who each synthesize the literature from their own field of study or perspective Each describes the theories models and concepts they use summarizes the key findings from their research and provides implications for practice policy and or research The

disciplinary chapters offer perspectives from higher education public policy behavioral economics social psychology STEM sociology and critical and post structural theory *Inequality around the World* Deric Shannon, 2025-02-06 A two volume set intended for readers interested in understanding the political and cultural underpinnings of socioeconomic inequality across the globe *Inequality around the World* examines key drivers and shapers of inequality at the local national and international level The two volume set includes 33 in depth chapters covering such issues as public and private healthcare environmental protection and pollution housing disability women s rights land policies antisemitism sexual orientation and gender diversity race and racism political representation and access to higher education Each chapter compares and contrasts conditions in major countries including the USA Russia India China and Germany as well as in wider regions like the Middle East West Africa Central America and Eastern Europe Scrupulously researched and wide ranging in coverage *Inequality around the World* provides an in depth survey of socioeconomic inequality in the 21st century in all its many forms *Austerity Blues* Michael Fabricant, Stephen Brier, 2016-11-01 A generation of budget cutting has eviscerated the very idea of public higher education in America Public higher education in the postwar era was a key economic and social driver in American life making college available to millions of working men and women Since the 1980s however government austerity policies and politics have severely reduced public investment in higher education exacerbating inequality among poor and working class students of color as well as part time faculty In *Austerity Blues* Michael Fabricant and Stephen Brier examine these devastating fiscal retrenchments nationally focusing closely on New York and California both of which were leaders in the historic expansion of public higher education in the postwar years and now are at the forefront of austerity measures Fabricant and Brier describe the extraordinary growth of public higher education after 1945 thanks largely to state investment the alternative intellectual and political traditions that defined the 1960s and the social and economic forces that produced austerity policies and inequality beginning in the late 1970s and 1980s A provocative indictment of the negative impact neoliberal policies have visited on the public university especially the growth of class racial and gender inequalities *Austerity Blues* also analyzes the many changes currently sweeping public higher education including the growing use of educational technology online learning and privatization while exploring how these developments hurt students and teachers In its final section the book offers examples of oppositional and emancipatory struggles and practices that can help reimagine public higher education in the future The ways in which factors as diverse as online learning privatization and disinvestment cohere into a single powerful force driving deepening inequality is the central theme of the book Incorporating the differing perspectives of students faculty members and administrators the book reveals how public education has been redefined as a private benefit often outsourced to for profit vendors who sell education back to indebted undergraduates Over the past twenty years tuition and related student debt have climbed precipitously and degree completion rates have dropped Not only has this new austerity threatened public universities ability to educate students Fabricant and Brier argue but it also

threatens to undermine the very meaning and purpose of public higher education in offering poor and working class students access to a quality education in a democracy Synthesizing historical sources social science research and contemporary reportage *Austerity Blues* will be of interest to readers concerned about rising inequality and the decline of public higher education *Insiders, Outliers* Collie Fulford, 2025-06-17 *Insiders Outliers* showcases the educational histories and lifewide writing experiences of adult HBCU students to illuminate critical needs for more age inclusive practices across academia Their cases also show the centrality of writing in fueling changes for these students and the people and institutions that they care about including higher education **Transformative Perspectives and Processes in Higher Education** Amber Dailey-Hebert, Kay S. Dennis, 2014-11-07 This book aims to provide insight into the complexities confronting higher education today and to highlight tangible opportunities that exist to address such issues We are in a constant state of flux and higher education needs to respond in more proactive intentional and innovative ways to remain a relevant cornerstone to society and culture The editors begin by asking how our collective reality might change if the complexity and uncertainty surrounding us were embraced and leveraged to serve the learner and society as a whole They invite the reader to explore collaborative approaches to individualized learning pathways networked learning and a reimagined ecosystem of academia The chapters are arranged to inform the reader seeking knowledge on how to 1 reshape and redefine the 21st century university with its evolving role in these transformative times 2 design and implement courses that address the changing needs of the university and the non traditional student and 3 utilize research on innovative strategies with processes that promote organizational learning The chapters profile the fluid nature of learning as it evolves in higher education and the workplace often with a blurred line separating the two environments Exciting ideas related to heutagogy problem based learning innovative constructivist strategies authentic learning and self regulated learning all converge in this volume

Digitized Institutions Jessie Daniels, Karen Gregory, Tressie McMillan Cottom, 2016-11-18 A key sociological insight is that institutions whether education the economy politics or the media shape the contours of individual life and drive inequality In this Byte the contributions take up the way that digitally mediated social processes are transforming institutions The writing here examines the interconnectedness of institutions and considers digitization across schooling work and media with an eye toward how inequality works Together these selections yield important insights into critical features of the institutions that mediate our digitized society arguing that digital sociology's greatest challenge is measuring inequalities that are produced by society's datalogical turn We're Still Here Jennifer M. Silva, 2019-07-03 *We're Still Here* provides powerful on the ground evidence of the remaking of working class identity and politics Drawing on years of fieldwork and over 100 interviews with black white and Latino working class residents of a declining coal town in Pennsylvania Jennifer M Silva tells a deep multi generational story of pain and politics *Non-State Actors in Education in the Global South* Prachi Srivastava, Geoffrey Walford, 2019-10-23 Fuelled by social equity concerns there have been vigorous

debates on the appropriateness of certain non state actors particularly those with commercial and entrepreneurial motives to meet universal education goals There are further questions on the relative effectiveness of government and private schooling in delivering good learning outcomes for all Within this debate several empirical questions abound Do students from poorer backgrounds achieve as well in private schools as their advantaged peers What are the relative out of pocket costs of accessing private schooling compared to government schooling Is fee paying non state provision affordable to the poorest households What is the nature of the education market at different levels What are the relationships between different non state actors and the state and how should they conduct themselves The chapters in this volume present new empirical evidence and conduct critical analysis on some of these questions This book was originally published as a special issue of the Oxford Review of Education
