Supporting Reading Grades 6-12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity, Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities support classroom teachers' instruction and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st Century Learner.

Book Clubs
Elizabeth Long, 2003-08. Book clubs are everywhere these days. And women talk about the clubs they belong to with surprising emotion. But why are the clubs so important to them? And what do the women discuss when they meet? To answer questions like these, Elizabeth Long spent years observing and participating in women's book clubs and interviewing members from different discussion groups. Far from being an isolated activity, she finds reading for club members to be an active and social pursuit, a crucial way for women to reflect creatively on the meaning of their lives and their place in the social order.

This book explains the value of the Invisible Web and how to access it. Most students and researchers possess only rudimentary Internet searching skills. The majority of school and public librarians are not aware of the breadth and depth of information available on the Hidden Web. This is unfortunate, as the ability to navigate the Hidden Web in schools and public libraries is essential to locating the most current and authoritative information. *The Hidden Web: A Sourcebook* serves as a valuable source of information about the Hidden Web, much of which comprises websites containing statistical information or data from a wide variety of government agencies. The concepts, search techniques, and specific websites presented will be helpful in information literacy instruction and the teaching of research skills.
