Algorithms, Automation, and News Neil Thurman, Seth C. Lewis, Jessica Kunert, 2021-05-18 This book examines the growing importance of algorithms and automation including emerging forms of artificial intelligence in the gathering composition and distribution of news In it the authors connect a long line of research on journalism and computation with scholarly and professional terrain yet to be explored Taken as a whole these chapters share some of the noble ambitions of the pioneering publications on reporting algorithms such as a desire to see computing

help journalists in their watchdog role by holding power to account. However, they also go further firstly by addressing the fuller range of technologies that computational journalism now consists of, from chatbots and recommender systems to artificial intelligence and atomised journalism. Secondly, they advance the literature by demonstrating the increased variety of uses for these technologies, including engaging underserved audiences, selling subscriptions and recombining and reusing content. Thirdly, they problematise computational journalism by, for example, pointing out some of the challenges inherent in applying artificial intelligence to investigative journalism and in trying to preserve public service values. Fourthly, they offer suggestions for future research and practice, including by presenting a framework for developing democratic news recommenders and another that may help us think about computational journalism in a more integrated, structured manner.

The chapters in this book were originally published as a special issue of *Digital Journalism*. *How I Built This* Guy Raz, Nils Parker, 2020. A NEW YORK TIMES BESTSELLER. WALL STREET JOURNAL 1 Bestselling Business Book. Based on the highly acclaimed NPR podcast *How I Built This* with Guy Raz, this book offers priceless insights and inspiration from the world's top entrepreneurs on how to start, launch and build a successful venture. *The Hybrid Media System* Andrew Chadwick, 2017-08-01. New communication technologies have reshaped media and politics. But who are the new power players? *The Hybrid Media System* is a sweeping new theory of how political communication now works. Politics is increasingly defined by organizations, groups and individuals who are best able to blend older and newer media logics in what Chadwick terms a hybrid system. From American presidential campaigns to WikiLeaks, from live prime ministerial debates to hotly contested political scandals, from the daily practices of journalists and campaign workers to the struggles of new activist organizations, the clash of media logics causes chaos and disintegration but also surprising new patterns of order and integration. The updated second edition features a new preface and an extensive new chapter applying the conceptual framework to the extraordinary 2016 U.S. presidential campaign, the rise of Donald Trump and the anti-Trump resistance protests. *Retirement Planning: Understanding Financial Independence in Retirement (Simple Guide to Help You Take Control and Be More Optimistic About the Future)* Robert Dunham, 101-01-01.
