**Mathematics for Biological Scientists** Mike Aitken,Bill Broadhurst,Stephen Hladky,2009-09-30 Mathematics for Biological Scientists is a new undergraduate textbook which covers the mathematics necessary for biology students to understand interpret and discuss biological questions The book s twelve chapters are organized into four themes The first theme covers the basic concepts of mathematics in biology discussing the mathematics used in biological quantities processes and structures The second theme calculus extends the language of mathematics to describe change The third theme is probability and statistics where the uncertainty and variation encountered in real biological data is described The fourth theme is explored briefly in the final chapter of the book which is to show how the tools developed in the first few chapters are used within biology to develop models of biological processes Mathematics for Biological Scientists fully integrates mathematics and biology with the use of colour illustrations and photographs to provide an engaging and informative approach to the subject of mathematics and statistics within biological science

**Building Mathematical Models in Excel** Christopher Teh Boon Sung,2015-05-18 This book is for agriculturists many of whom are either novices or non computer programmers about how they can build their mathematical models in Microsoft Excel Of all modeling platforms spreadsheets like Excel require the least proficiency in computer programming This book introduces an Excel add in called BuildIt available for free as download that shields users from having to use Excel s VBA Visual Basic for Applications programming language and yet allows agriculturists to build simple to large complex models without having to learn complicated computer programming techniques or to use sophisticated Excel techniques This

book first discusses how BuildIt works and how it is used to build models Examples range from the simple to progressively more complex mathematical models Ultimately readers are taught how to build a generic crop growth model from its five core components meteorology canopy photosynthesis energy balance soil water and crop growth development Ultimately agriculturists will be able to build their own mathematical models in Excel and concentrate more on the science and mathematics of their modeling work rather than being distracted by the intricacies of computer programming [InfoWorld](#) ,1986-05-12 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **InfoWorld** ,1993-08-23 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Intermediate Perl** Randal L. Schwartz,brian d foy,Tom Phoenix,2012-07-26 This book picks up right where Learning Perl leaves off With Intermediate Perl you ll graduate from short scripts to much larger programs using features that make Perl a general purpose language This gentle but thorough guide introduces you to modules complex data structures and object oriented programming Each chapter is small enough to be read in just an hour or two ending with exercises to help you practice what you ve learned If you re familiar with the material in Learning Perl and have the ambition to go further Intermediate Perl will teach you most of the core Perl language concepts you need for writing robust programs on any platform Topics include Packages and namespaces References and scoping including regular expression references Manipulating complex data structures Object oriented programming Writing and using modules Testing Perl code Contributing to CPAN Just like Learning Perl material in this book closely follows the popular introductory Perl course the authors have taught since 1991 This second edition covers recent changes to the language up to version 5.14
