New Technologies And Human Rights Challenges To Regulation:

New Technologies and Human Rights Mr Mario Viola de Azevedo Cunha, 2013-10-28 Whilst advances in biotechnology and information technology have undoubtedly resulted in better quality of life for mankind they can also bring about global problems The legal response to the challenges caused by the rapid progress of technological change has been slow and the question of how international human rights should be protected and promoted with respect to science and technology remains unexplored The contributors to this book explore the political discourse and power relations of technological growth and human rights issues between the Global South and the Global North and uncover the different perspectives of both regions They investigate the conflict between technology and human rights and the perpetuation of inequality and subjection of the South to the North With emerging economies such as Brazil playing a major role in trade investment and financial law the book examines how human rights are affected in Southern countries and identifies significant challenges to reform in the areas of international law and policy *New Technologies and Human Rights*, 2013

New Technologies for Human Rights Law and Practice Molly K. Land, Jay D. Aronson, 2018-04-19 New technological innovations offer significant opportunities to promote and protect human rights At the same time they also pose undeniable risks In some areas they may even be changing what we mean by human rights The fact that new technologies are often privately controlled raises further questions about accountability and transparency and the role of human rights in regulating these actors This volume edited by Molly K Land and Jay D Aronson provides an essential roadmap for understanding the relationship between technology and human rights law and practice It offers cutting edge analysis and practical strategies in contexts as diverse as autonomous lethal weapons climate change technology the Internet and social media and water meters This title is also available as Open Access **Intellectual Property Perspectives on the Regulation of New**

Technologies Tana Pistorius, 2018-10-26 This book explores the challenges that emerging technologies and technology driven practices pose for traditional notions of intellectual property IP law and policy Chapters offer perspectives from across the IP law spectrum and address questions such as is the law evolving in the right direction and is the regulation of emerging technology supported by sound policy objectives Covering a diverse range of topics this book exposes the intimate relationship between IP and technology The Impact of Science and Technology on the Rights of the Individual Nicola Lucchi, 2016-06-14 The volume is devoted to the relevant problems in the legal sphere created and generated by recent advances in science and technology In particular it investigates a series of cutting edge contemporary and controversial case studies where scientific and technological issues intersect with individual legal rights The book addresses challenging topics at the intersection of communication technologies and biotech innovations such as freedom of expression right to health knowledge production Internet content regulation accessibility and freedom of scientific research **The Oxford**

Handbook of Law, Regulation and Technology Roger Brownsword, Eloise Scotford, Karen Yeung, 2017 The variety pace

and power of technological innovations that have emerged in the 21st Century have been breathtaking. These technological developments which include advances in networked information and communications, biotechnology, neurotechnology, nanotechnology, robotics, and environmental engineering technology have raised a number of vital and complex questions. Although these technologies have the potential to generate positive transformation and help address grand societal challenges, the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects. Is there a potential harm to human health or the environment? What are the ethical implications? Do these innovations erode or antagonize values such as human dignity, privacy, democracy, or other norms underpinning existing bodies of law and regulation? These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal, social, and ethical dimensions of technological innovation. This handbook collates the many and varied strands of this scholarship, focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law, emerging technology, and regulation. Structured in five parts, the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance; II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate; III studies the challenges for law in responding to the emergence of new technologies, examining how legal norms, doctrine, and institutions have been shaped, challenged, and destabilized by technology, and even how technologies have been shaped by legal regimes; IV provides a critical exploration of the implications of technological innovation, examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance; V explores various interfaces between law, regulatory governance, and new technologies across a range of key social domains.

Current Debates in International Relations & Law Övgü Kalkan Küçüksolak, 2018. In this collection of CUDES 2017, a wide spectrum of topics that occupy primary place in the current debates of International Relations and Law were addressed by the papers presented at the Current Debates in Social Sciences Conference which was held in Istanbul on December 14-16, 2017. The purpose of this conference was to provide a forum for scholars, researchers, and students to foster discussion and expand understanding on the current themes of Social Sciences. In parallel to changing and multiplying dynamics of world politics, papers reflect diversity of issues in International Relations and Law, including the impacts of the Syrian Refugee Crisis, on EU-Turkey relations, lone wolf terrorism, energy security, Russia's domestic factors in its foreign policy, foreign policy of Iran and Russia in the Middle East, Mirziyoyev's first year in presidency, Turkish foreign aid under the Justice and Development Party, the place of civil aviation in Turkish foreign policy as a soft power instrument, the Kosovo intervention in the context of UN's human security discourse, UN and gender issues, mediation in international law, and Turkey's

Law and Neuroscience: Justice as a Challenge for Neurorights, Neurolaw, and Forensic Psychology Eric García-López,Eduardo Demetrio Crespo,Cristina Nombela Otero ,Federica Coppola,2025-05-29 Justice is one of the most complex issues in the study of Law Philosophical sociological and religious studies have attempted to articulate this value central to human coexistence throughout history More recently specialised sub disciplines such as Legal Psychology have significantly contributed to refining the relationship between Law and Justice by enriching the study of these normative domains with empirical knowledge about social interactions In more recent developments the discipline of Neurolaw has begun to offer new insights into the analysis of the longstanding and disputed issues surrounding Law and Justice Neurolaw can be defined as the analysis of Law and Justice from the perspective of Neuroscience and involves an understanding of human behavior through the study of the brain s interactions with the environment Neuroscience appears to provide a more up to date understanding of human behavior focussing on the legal and forensic implications Yet neuroscientific studies of crime fail to grasp the impact of broader socio contextual contingencies on human conduct including institutional failures gender dynamics and cultural power Such a failure evidences the limits of neuroscience as a complete epistemological tool It is too narrow to provide a complete understanding of complex human conduct like crime as it involves a careful examination of the variegated interactions between various social and biological levels This Research Topic addresses the need for developing a holistic theoretical framework that considers not only the biological nature of human beings but also the social cultural and political influences

on human behavior Such a holistic approach is necessary to clarify some foundational philosophical questions including subjectivity and consciousness as well as the role that these concepts play within the notion of criminal liability and punishment In addition to these unresolved philosophical questions there is also the need for a revised legal and forensic approach that grasps a more nuanced and complex understanding of human conduct Topics for contributions include but are not limited to the following Neuroscience Law and Criminal Justice Neuroscience Law and Social Justice Neuroscience Law and Racial Justice Neuroscience and Restorative Justice Neurorights Neuroethics Criminal responsibility Decision making Juvenile Criminal Law and Punishment Free will Ethical legal and social repercussions of the neurotechnologies currently available as well as of those that are currently being developed We welcome submissions from authors with backgrounds in law justice philosophy forensic neuropsychology forensic cognitive social psychology forensic psychiatry criminology sociology addressing theoretical methodological or empirical issues related to these topics and other related ones Cross inter and multidisciplinary contributions are of course welcome

State Agency and the Patenting of Life in International Law
Bita Amani, 2016-12-05 How should a state respond to competing international obligations where the patenting of life is concerned Following the institutionalization of Intellectual Property in the world trading system under the Agreement on Trade Related Aspects of Intellectual Property Rights TRIPS states face differing challenges and restraints on their freedom to develop biopatenting programmes Through a comparative review of patenting in two key but diverging jurisdictions Canada and the US this book considers how states might exercise the right of self determination in their domestic law and policy over biopatenting to promote objectives of human welfare and fair competition Departing from existing studies this timely and important volume offers a pragmatic two step approach to state agency to resolve apparent conflicts between the regulatory options afforded by economic globalization and the need to forge domestic laws that reflect community values In this approach rich and poor countries alike are invited to assert the primacy of human rights in their industrial and cultural policies
