The Cinema of Things Elizabeth Ezra, 2017-11-02 This book explores the border zones between life and non life as represented in cinema from the end of the nineteenth century when France led the global film industry to the first decades of the twenty first century when world film markets are dominated by Hollywood Informed by both the Internet of Things and the Parliament of Things The Cinema of Things examines cinematic depictions of the ways in which human beings are prosthetically engaged with life beyond the self in the global age by hyperconsumption by

structures of racial and sexual objectification that reduce people designated as others to objects of fascination sexual gratification warfare or labor and by information technology that replaces human agency with encoding Consumer culture a key feature of globalization posits that we must supplement ourselves with commodities without which we would otherwise be incomplete but these prostheses rather than enhancing us end up creating the insufficiencies they were meant to overcome We are engulfed by objects to the extent that we ourselves are becoming objectified At the same time objects especially technological objects are becoming increasingly autonomous assuming roles that were once the preserve of human agency We are becoming the objects of globalization and cinema imaginatively represents this transformation but it also offers us the possibility of retaining our humanity in the process

The National Magazine; A Monthly Journal of American History, 1887 Does the Constitution Follow the Flag? Kal Raustiala, 2011

The Bush Administration has notoriously argued that detainees at Guantanamo do not enjoy constitutional rights because they are held outside American borders But where do rules about territorial legal limits such as this one come from Why does geography make a difference for what legal rules apply Most people intuitively understand that location affects constitutional rights but the legal and political basis for territorial jurisdiction is poorly understood In this novel and accessible treatment of territoriality in American law and foreign policy Kal Raustiala begins by tracing the history of the subject from its origins in post revolutionary America to the Indian wars and overseas imperialism of the 19th century He then takes the reader through the Cold War and the globalization era before closing with a powerful explanation of America's attempt to increase its extraterritorial power in the post 9 11 world As American power has grown our understanding of extraterritorial legal rights has expanded too and Raustiala illuminates why America's assumptions about sovereignty and territory have changed Throughout he focuses on how the legal limits of territorial sovereignty have diminished to accommodate the expanding American empire and addresses how such limits ought to look in the wake of Iraq Afghanistan and the war on terror A timely and engaging narrative Does the Constitution Follow the Flag will change how we think about American territory American law and ultimately the changing nature of American power
