*Charting Reform, Achieving Equity in a Diverse Nation* Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and

opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens

**Charter Schools and Their Enemies** Thomas Sowell, 2020-07-14 Winner of the 2021 Hayek Book Prize A leading conservative intellectual defends charter schools against the teachers unions politicians and liberal educators who threaten to dismantle their success The black white educational achievement gap so much discussed for so many years has already been closed by black students attending New York City s charter schools This might be expected to be welcome news But it has been very unwelcome news in traditional public schools whose students are transferring to charter schools A backlash against charter schools has been led by teachers unions politicians and others not only in New York but across the country If those attacks succeed the biggest losers will be minority youngsters for whom a quality education is their biggest chance for a better life

Great American School System Diane Ravitch, 2016-06-28 An urgent case for protecting public education from one of America's best known education experts In this landmark book Diane Ravitch former assistant secretary of education and a leader in the drive to create a national curriculum examines her career in education reform and repudiates positions that she once staunchly advocated Drawing on over forty years of research and experience Ravitch critiques today's most popular ideas for restructuring schools including privatization the Common Core standardized testing the replacement of teachers by technology charter schools and vouchers She shows conclusively why the business model is not an appropriate way to improve schools Using examples from major cities like New York Philadelphia Chicago Denver and San Diego Ravitch makes the case that public education today is in peril and includes clear prescriptions for improving America's schools *The Death and Life of the Great American School System* is more than just an analysis of the state of play of the American education system It is a must read for any stakeholder in the future of American schooling *School Leader's Guide to Root Cause Analysis* Paul Preuss, 2013-09-27 Don't jump from problem to solution without first investigating root causes This book helps you more accurately focus on school improvement issues so you can avoid wasting precious time and resources It is clearly written contains lots of real examples and is presented in a style and format designed for the non expert It will help you make decisions which will improve learning for all students *The Street Stops Here* Patrick McCloskey, 2010-10-30 A harrowing honest and often moving story Andrew Greeley McCloskey shows how challenging it is to succeed under adverse circumstances how tenuous are the victories how relentless are those who wage the battle to overcome the historic disadvantages of their students Diane Ravitch New York University Sheds light on important issues cutting across all city schools Joseph P Viteritti author of *Choosing Equality* **Eliminating the Achievement Gap** William Jeynes, 2019-10-04 The purpose of the *Eliminating the Achievement Gap* is to provide a resource for scholars and students into many of the most salient issues trends and factors that are most effective in reducing the achievement gap *Eliminating the Achievement Gap* is particularly unique because it will 1 utilize a meta analysis to determine what factors contribute the most to reducing the achievement gap and 2 examine potential achievement gap reducing variables from across disciplines These disciplines include education sociology economics family science psychology public policy and educational psychology The second emphasis is largely based on the meta analysis because the results of the meta analysis indicate that the best way to completely eliminate the achievement gap is to initiate a multidisciplinary approach to the achievement gap It is the intention of this book to make scholars educators policymakers parents and the general public more aware of the factors that best bridge the achievement gap so that they can take major steps to implementing comprehensive and multidisciplinary efforts The more such efforts are inaugurated the more the achievement gap will be reduced The nine chapters of this book are therefore divided into four parts to reflect this extent of this comprehensive approach *Digest of Education Statistics* , *Basic Skills*, 1979 United States. In recent years there have been increasing efforts to use accountability systems based on large scale tests of students as a mechanism for improving student achievement The federal No Child Left Behind Act NCLB is a prominent example of such an effort but it is only the continuation of a steady trend toward greater test based accountability in education that has been going on for decades Over time such accountability systems included ever stronger incentives to motivate school administrators teachers and students to perform better Incentives and Test Based Accountability in Education reviews and synthesizes relevant research from economics psychology education and related fields about how incentives work in educational accountability systems The book helps identify circumstances in which test based incentives may have a positive or a negative impact on student learning and offers recommendations for how to improve current test based accountability policies The most important directions for further research are also highlighted For the first time research and theory on incentives from the fields of economics psychology and educational measurement have all been pulled together and synthesized Incentives and Test Based Accountability in Education will inform people about the motivation of educators and students and inform policy discussions about NCLB and state accountability systems Education researchers K 12 school administrators and teachers as well as graduate students studying education policy and educational measurement will use this book to learn more about the motivation of educators and students Education policy makers at all levels of government will rely on this book to inform policy discussions about NCLB and state accountability systems      Holding Schools Accountable Helen Ladd,2011-01-01

Perhaps the most urgent and complex task facing American education today is to figure out how to hold schools accountable for improved academic achievement In this important new work Helen Ladd and her colleagues describe the options available to policymakers weigh their respective strengths and pitfalls and lay out principles for creating schools where learning is the number one objective This book should be at the top of the reading list for anyone seriously interested in transforming the quality of American schools Edward B Fiske Former Education Editor The New York Times A central theme of current efforts to reform elementary and secondary education in the United States is a more explicit focus on the outcomes of the educational system This volume examines efforts throughout the country to hold schools accountable for the academic performance of their students Researchers from various disciplines most notably economics educational policy and management and political science address a range of questions related to performance based strategies for reforming education The authors describe and evaluate programs that recognize and reward the most effective schools discuss the

costs of achieving high performance summarize what is known about parental choice as an accountability mechanism and provide new evidence on the relationship between school inputs and educational outcomes Grounded in the actual experiences of various states and school districts the book provides a wealth of new information and provocative insights Contributors argue that programs to hold schools accountable for student performance must be carefully designed to assure that schools are treated fairly that vouchers if used should be directed toward low income families that resources do indeed matter poor school districts may well require additional funding to increase student learning In addition to the editor the contributors include Charles T Clotfelter David K Cohen Richard F Elmore Ronald F Ferguson Susan H Fuhrman Eric A Hanushek Caroline Minter Hoxby Richard J Murnane John F Witte and John McHenry Yinger
