Democracy in Action: Structures, Systems, and Struggles RAJEEV RUNGTA, DR. VIKAS GOEL, Preface Democracy in Action Structures Systems and Struggles is an exploration of one of humanity's most enduring and evolving ideals democracy This book seeks to illuminate not only the institutional frameworks and political philosophies that underpin democratic governance but also the social cultural and technological forces that continue to shape its practice across the world Democracy at its heart is not a static concept it is a living process of negotiation between power and people freedom and responsibility ideals and realities The book thus journeys through its origins evolution and modern complexities offering a comprehensive understanding of how democratic systems function adapt and sometimes falter Beginning with the intellectual foundations of democracy in ancient civilizations and moving through its modern transformations the chapters trace the interplay between constitutional structures electoral systems political parties and civic movements that give life to democratic governance From the design of representative institutions to the pressures of globalization technology and media the text unpacks how democracy both shapes and is shaped by the societies that practice it In doing so it invites readers to reflect on the balance between institutions and individuals governance and participation rights and duties In today's world marked by populism polarization misinformation and the blurring of national boundaries the meaning of democracy is being re-examined more urgently than ever This book acknowledges these tensions while remaining grounded in the belief that democracy's strength lies in its capacity for self-correction dialogue and reform It also emphasizes the moral dimension of democracy its connection to human rights equality and justice drawing attention to the struggles and movements that have expanded its promise across continents and centuries Each chapter of Democracy in Action builds upon the last to provide a multidimensional perspective from the architecture of constitutions and the pulse of electoral systems to the voices of citizens activists and institutions that sustain the democratic fabric The final chapter turns toward the future posing critical questions about how democracy can endure and adapt in an era of artificial intelligence climate challenges and geopolitical shifts This book is intended for students scholars and citizens alike those who seek to understand not only how democracies are built but how they can be strengthened It is both a study and a call to action to view democracy not as a finished structure but as an ongoing struggle and shared responsibility a testament to the human pursuit of dignity representation and justice Authors Jamuna Devi Rajnish Lather Jyoti Janardhan Reddy Prof Dr Punit Goel

The distinctive point of the book is its innovative interdisciplinary approach to business communication with interconnections between linguistics, sociology, and critical organisational studies as applied to the corporate world. It offers a first-hand insight into primary business discourse with a deeper understanding and analysis of business processes and mechanisms underlying and reflected in enterprise software-mediated communication. It answers the question: what does doing business in the digital age is about and illustrates business discourse from practitioners' point of view. Grounded in the analysis of empirical data pertaining both to internal and external business communication, the author reflects on the reality of accelerated and pressurised communication in global IT corporations. Following a communication-centred approach, this monograph puts the topic of enterprise software-mediated business discourse into a multi-layered perspective of how global corporations operate, what their primary goals are, and what kind of political power they execute. Moreover, it demonstrates how profit-driven corporations can be viewed and interpreted as strategically acting systems within a specific sociological framework. Network World, 1994-05-02.
