External Relations Dept.,2017-09-07 This paper discusses about countries that must chart their own paths to effectively balance the potential benefits against the risks and challenges including institutional and capacity constraints privacy concerns and new avenues for fraud and evasion The digital revolution holds vast potential for fiscal policies By transforming the way fiscal systems collect process and act on information it can expand and reshape the way governments design and implement their tax spending and macro fiscal policies Countries will need to chart a path based on their individual circumstances either by taking incremental steps to digitize or by leapfrogging to newer and more sophisticated methods of policy formulation and implementation A recurring theme in this book is the need for greater regional coordination in finding solutions to address the Caribbean s shared and intertwined macroeconomic and structural challenges The analysis suggests that strengthening regional and global market integration of Caribbean economies would provide an impetus to sustained growth in incomes and jobs **UK Banks and the Lessons of the Great Financial Crisis**

Adam Barber,2021-05-10 This book demonstrates the variation in the reaction of the UK s big four banks RBS Lloyds Barclays and HSBC to the Great Financial Crisis 2008 Over a decade on from the financial crisis this book asks have banks in the UK learned lessons from the crisis Bank learning in the UK after the Great Financial Crisis is something we need to know more about Whether banks are now safer and more likely to aid rather than disrupt the economy are important questions of social relevance Through a documentary analysis of Britain s big four banks in the post crisis decade 2008 2018 this book demonstrates that while some institutions have become more risk averse and display positive signs of learning others have shown little evidence of change The book uses notions of agency path dependency and structural competitive pressures to explain these inter bank variations of behaviour This book contributes to wider post crash structural debates about growth markets and regulatory reform showing how the agency of banks has played a vital role in driving the reform process

National Institute for Health and Clinical Excellence Great Britain: Parliament: House of Commons: Health Committee,2013-01-16 The Health Committee is highly critical of the delay in setting out precisely what a value based pricing system for drugs entails There is also uncertainty about the implications of the changes proposed for the Cancer Drugs Fund which was introduced in 2011 to allow clinicians to use drugs that had not been approved by NICE and which will be superseded by the value based pricing system The Committee calls for an assessment of the outcomes for those patients whose treatment has been paid for by the Cancer Drugs Fund evidence of beneficial outcomes which should inform the new value based pricing scheme and applied to treatments of conditions other than cancer and clarity about how drugs which have been paid for by the Fund will continue to be available to individual patients There is also concern about the implications for the effectiveness of NICE of recent evidence about access to information from clinical drug trials There should be both a professional and legal obligation to ensure that all regulators including NICE have access to all available research data about the efficacy and safety of pharmaceutical products which are in use in the UK The pharmaceutical industry should introduce a new code of practice to make this commitment effective and the GMC should reiterate its guidance to doctors on the conduct of drug trials Is important for the credibility of NICE that Patient voice is effectively and openly represented in all its work and that NICE guidance should continue to be guidance rather than an instruction and that the NHS should continue to allow local discretion but variations from NICE guidance should be open transparent and accountable *Compendium on Monetary Policy Guidelines and Federal Reserve Structure* United States. Congress. House. Committee on Banking and Currency. Subcommittee on Domestic Finance,1968 [Annotation](#) ,1987 [Resources in Education](#) ,2001-10 [The City Creative](#) Michael H. Carriere,David Schalliol,2021-04-18 In the wake of the Great Recession American cities from Philadelphia to San Diego saw an upsurge in hyperlocal placemaking small scale interventions aimed at encouraging greater equity and community engagement in growth and renewal But the projects that were the most successful at achieving these lofty ambitions weren t usually established by politicians urban planners or real estate

developers they were initiated by community activists artists and neighbors In order to figure out why The City Creative mounts a comprehensive study of placemaking in urban America tracing its intellectual history and contrasting it with the efforts of people making positive change in their communities today Spanning the 1950s to the post recession 2010s The City Creative highlights the roles of such prominent individuals and organizations as Jane Jacobs Christopher Alexander Richard Sennett Project for Public Spaces and the National Endowment for the Arts in the development of urban placemaking both in the abstract and on the ground But that s only half the story Bringing the narrative to the present Michael H Carriere and David Schalliol also detail placemaking interventions at more than 200 sites in more than 40 cities combining archival research interviews participant observation and Schalliol s powerful documentary photography Carriere and Schalliol find that while these formal and informal placemaking interventions can bridge local community development and regional economic plans more often than not they push the boundaries of mainstream placemaking Rather than simply stressing sociability or market driven economic development these initiatives offer an alternative model of community led progress with the potential to redistribute valuable resources while producing tangible and intangible benefits for their communities The City Creative provides a kaleidoscopic overview of how these initiatives grow and sometimes collapse illustrating the centrality of placemaking in the evolution of the American city and how it can be reoriented to meet demands for a more equitable future

reading The Great Debates series provides engaging and accessible analysis of the more advanced legal concepts For books in the major taught subjects such as land law the series is designed for use by ambitious students alongside a main course textbook For books addressing subjects that are less often taught such as family law the series provides a clear and critical exposition of the key areas of debate By focussing on particular questions and tensions underlying a subject Great Debates titles encourage students to think critically analyse a topic and gain additional insights These skills and the discursive nature of the series with an emphasis on contentious topics are also useful for students when preparing their dissertations
