Retail Therapy Mark Pilkington, 2019-01-10 An insightful review of the collapse of the traditional retail sector in the West and a roadmap for its potential recovery. Almost weekly the news is full of stories about disappearing retail chains. From House of Fraser and BHS to Toys R Us and Sears, recognised names are vanishing overnight as such large organizations disappear so the malls, shopping centres, high streets and main streets become emptier and less appealing to visit. The retail

sector is hugely important in terms of job numbers in the US it employs around 30 million people directly and indirectly in the UK around 10 million As such anything that jeopardises the retail sector will have a deep and lasting impact on millions of lives as well as on public policy While many blame the Amazon effect this is an oversimplification Deeper forces are at work that are changing people's relationships with brands the balance of power between producers and consumers and the whole nature of the supply chain that has existed since the industrial revolution Retail Therapy offers a comprehensive analysis of these forces and their impact on the world of retailing More importantly it presents a cogent analysis of the longer term trends that are shaping retailing and outlines a clear road map for sustainable success in the future **Bowker's**
