This new edition brings the subject up to date with the latest thinking and research on policy, globalisation, learning and knowledge, offering an accessible and wide ranging introduction to a diverse range of topics and issues in education. Now fully updated to reflect rapid and significant changes in the field, this third edition considers topical issues including the political dimension of education, the national debate about schooling and poverty, the marketisation of education, the end of Every Child Matters, the Coalition Government's policies for academies and free schools. Organised around three enduring themes: Education Policy and Politics, Global and Environmental Education and Learning, Knowledge and the Curriculum, each chapter contains summary points, questions for discussion and annotated suggestions for further reading. With a distinctive international and global focus, A Student's Guide to Education Studies is an essential resource for all students of Education Studies.
