Adriatic Robert D. Kaplan, 2022-04-12 An elegantly layered exploration of Europe's past and future a multifaceted masterpiece The Wall Street Journal A lovely personal journey around the Adriatic in which Robert Kaplan revisits places and peoples he first encountered decades ago Peter Frankopan author of The Silk Roads ONE OF THE BEST BOOKS OF THE YEAR The New Yorker In this insightful travelogue Robert D Kaplan geopolitical expert and bestselling author of Balkan Ghosts and The Revenge of Geography turns his perceptive eye to a region that for centuries has been a meeting point of cultures trade and ideas He undertakes a journey around the Adriatic Sea through Italy Slovenia Croatia Montenegro Albania and Greece to reveal that far more is happening in the region than most news stories let on Often overlooked the Adriatic is in fact at the center of the most significant challenges of our time including the rise of populist politics the refugee crisis and battles over the control of energy resources And it is once again becoming a global trading hub that will determine Europe's relationship with the rest of the world as China and Russia compete for dominance in its ports Kaplan explores how the region has changed over his three decades of observing it as a journalist He finds that to understand both the historical and contemporary Adriatic is to gain a window on the future of Europe as a whole and he unearths a stark truth The era of populism is an epiphenomenon a symptom of the age of nationalism coming to an end Instead the continent is returning to alignments of the early modern era as distinctions between East and West meet and break down within the Adriatic countries and ultimately throughout Europe With a brilliant cross pollination of history literature art architecture and current events in Adriatic Kaplan demonstrates that this unique region that exists at the intersection of civilizations holds revelatory truths for the future of global affairs

Choreographing Relations Petra Sabisch, 2011 Choreographing Relations undertakes the experiment of a conceptual site development of contemporary choreography by means of practical philosophy Guided by the radically empiricist question What Can Choreography Do the book investigates the performances of Antonia Baehr Juan Dominguez Xavier Le Roy and

Eszter Salamon and the philosophical works of Gilles Deleuze and Félix Guattari. It establishes a relation between these practitioners as an encounter in method and develops method as a singular material and experimental practice. In view of these singular methods and the participatory relations to which they give rise, *Choreographing Relations* offers a prolific inventory of representational procedures that qualitatively transformed choreography and philosophy at the turn of the twentieth century.

A Bibliography of Female Economic Thought up to 1940 Kirsten Madden, Michele Pujol, Janet Seiz, 2004-03-01 Contributions to female economic thought have come from prolific scholars, leading social reformers, economic journalists and government officials along with many other women who contributed only one or two works to the field. It is perhaps for this reason that a comprehensive bibliographic collection has failed to appear until now. This innovative book brings together the most comprehensive collection to date of references to women's economic writing from the 1770s to 1940. It includes thousands of contributions from more than 1 700 women from the UK, the US and many other countries. This bibliography is an important reference work for systematic inquiry into questions of gender and the history of economic thought. This volume is a valuable resource and will interest researchers on women's contributions to economic thought, the sociology of economics and the lives of female social scientists and activist authors. With a comprehensive editorial introduction, it fills a long standing gap and will be greeted warmly by scholars of the history of economic thought and those involved in feminist economics.

Ian McHarg and the Search for Ideal Order Kathleen John-Alder, 2019-09-17 Ian McHarg and the *Search for Ideal Order* looks at the well known and studied landscape architect Ian McHarg in a new light. The author explores McHarg's formative years and investigates how his ideas developed in both their complexity and scale. As a precursor to McHarg's approach in his influential book *Design with Nature*, this book offers new interpretations into his search for environmental order and outlines how his struggle to understand humanity's relationship to the environment in an era of rapid social and technological change reflects an ongoing challenge that landscape design has yet to fully resolve. This book will be of great interest to academics and researchers in landscape architectural history.

[The Methodology of Economic Thought](#) Marc Reed Tool, Warren J. Samuels, 1989-01-01 This collection of articles taken from the *Journal of Economic Issues* offers both a fresh perspective and a persuasive diagnosis on economic methodology. It simultaneously presents institutional economists' approaches to economic inquiry and policy as well as a running critique of conceptual flaw and inadequacies of the traditional orthodox neoclassical approach that dominates college curriculums and media.

Approaching the World's Religions, Volume 1 Robert Boyd, 2017-05-04 Philosophically Thinking about World Religions is different from other works in the discipline today. It deviates from the typical approaches used for the study of world religions. Its goal is to engage readers in thinking hard about world religions.

not about the data surrounding those traditions By focusing on philosophical questions each reader should be challenged to do their own investigations that may reveal the heart of these traditions Another stance that this project takes that distinguishes it from other texts in the discipline is that it advocates an inclusivist perspective regarding the world religions Pluralism which is the predominate assumption today ends either in contradiction or in the development of a metatheory that dismisses crucial distinctions between the various traditions or eliminates some ancient religions because they do not fit the metatheory By taking an open inclusivist approach all religious traditions may engage at the table of dialogue The final essay is about justice and social affairs While that discussion is couched within the context of a particular tradition each religious tradition must have the discussion But it must be more than an intrareligious dialogue it must become an interreligious dialogue
