Maren Hartmann, Patrick Rössler, Joachim Höflich, 2008-07-30 After the Mobile Phone Social Changes and the Development of Mobile Communication is a book that looks beyond It looks beyond in terms of the coming developments concerning mobile technologies of changes in the mobile media markets of new aspects of mobile media uses Moreover it expands existing theoretical frameworks since it uses diverse approaches from social sciences from media studies from technology studies etc After the Mobile Phone also goes beyond the usual work on mobile media as it looks at wider societal appropriation processes It is an up to date survey of how mobile media are used produced and imagined The authors in this book represent a range of well known scholars in the field They come from diverse backgrounds and represent a number of different countries Consuming Music Together Kenton O'Hara, Barry Brown, 2006-01-09 Listening to buying and sharing music is an immensely important part of everyday life Yet recent technological developments are increasingly changing how we use and consume music This book collects together the most recent studies of music consumption and new developments in music technology It combines the perspectives of both social scientists and technology designers uncovering how new music technologies are actually being used along with discussions of new music technologies still in development With a specific focus on the social nature of music the book breaks new ground in bringing together discussions of both the social and technological aspects of music use Chapters cover topics such as the use of the iPod music technologies which encourage social interaction in public places and music sharing on the internet A valuable collection for anyone concerned with the future of music technology this book will be of particular interest to those designing new music technologies those working in the music industry along with students of music and new technology Computerworld, 1999-07-05 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network , **New Social Ties** Deborah Chambers, 2006-10-12 Deborah Chambers draws on the metaphor of friendship as a strategy for exploring contemporary changes in informal social ties She traces the shift from fixed and permanent ties of family neighbourhood and community to fluid and transient ties typified by computer mediated communication Spectrum Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2011-11-03 This report looks at the way in which commercial spectrum holdings are allocated and regulated This investigation was prompted by the imminence of the next spectrum auction in 2012 Ofcom as spectrum regulator has a very difficult role to play in striking a balance between the needs of consumers spectrum users and service providers and the public purse The report finds that Ofcom is doing a good job in striking this balance and is often having to make very difficult

and commercially sensitive judgements Ofcom's consultation on the rules for the next auction has divided opinion among the four mobile network operators but the Committee remarks that they rarely agree on matters concerning spectrum allocation Ofcom proposes that one of the spectrum licences available at the auction will contain a coverage obligation requiring the successful bidder to offer mobile internet coverage to an area in which at least 95% of the population lives The Committee believes that this does not go far enough to hasten the roll out of mobile broadband and recommends that the coverage obligation should be set at 98% and that Ofcom consider applying this obligation to more than one licence The Committee agree with proposals to implement spectrum caps and floors at the auction this being the best viable option to ensure a competitive tension in the spectrum market place Ofcom's remit should be widened in order that the interests of British businesses whose spectrum use plays an important part in the UK economy are best served
