people did not live long enough to reach the grandparent stage of life Today people are living longer and grandparenting is occupying a longer phase in one's life Grandparenting is becoming its own life stage where new rituals exclusive to grandparents are emerging Newer technologies such as Skype Google Hangout and FaceTime allow grandparents who are far away to establish relationships with their children Many grandparents also use social media and blogs to chronicle their experiences Some grandparents have turned their grandparent lifestyle into a business The representation of grandparenting in popular culture is shifting as well Grandparents are becoming their own figures on television and film programs including reality shows Others have been thrust into the public eye across social media Marketers have realized the power of this new consumer subgroup and have begun to direct marketing campaigns to grandparents Yet despite the pervasive images of grandparents some of which present empowered figures grandparent representation in popular media continues to mimic many of the stereotypes commonly associated with aging encouraging people to laugh at versus laugh with these figures
