Nice Book Infinity Beckoned Adventuring Through 19691989:

Island of Clouds Gerald Brennan, 2017-05-08 April 1972 Three legendary astronauts embark on mankind's boldest space voyage yet a yearlong mission to fly past our nearest planetary neighbor Venus What follows will be a journey more harrowing than any of them can imagine Island of Clouds the first full length novel in the Altered Space series is a gripping space epic based on NASA mission proposals from the late 1960s Touching on literary influences ranging from Borges and Bukowski to the Book of Job this story of exploration also offers a literary probing of the dark reaches of human nature alcoholism capitalism authority fatherhood and the ephemeral nature of desire The titles in the Altered Space series are wholly separate narratives but all deal with the mysteries of space and time progress and circularity Each one is an ens of words in which orbits of spacecraft moons planets and people allow us fresh perspectives on the cycles of our own lives

Apollo 11 James Donovan, 2019-05-13 Apollo 11 die unmögliche Mission In der Nacht vor seinem Flug zum Mond rechnete Neil Armstrong die Chancen aus die er Buzz Aldrin und Michael Collins hatten um lebend zur Erde zurückzukehren Fifty Fifty dachte er Andere Experten hingegen darunter auch Wissenschaftler und Techniker der NASA sahen die Sache weitaus weniger optimistisch 5 zu 1 sagten sie dass die Männer nicht zurückkommen Oder sogar 10 zu 1 Apollo 11 war die unmögliche Mission ihr Scheitern wahrscheinlicher als ihr Erfolg Praktisch zum Jahrestag erzählt der Journalist und Historiker James Donovan die Geschichte der Mondlandung in allen spannenden Details noch einmal neu und legt dabei auch viel Gewicht auf die menschliche Seite Entstanden ist ein mitreißendes und reich bebildertes Sachbuch **Star Bound** Emily Carney, Bruce McCandless, 2025 Star Bound is a book for anyone who wants to learn about the American space program but isn't sure where to start First and foremost it's a history short sweet and straightforward From rocketry pioneer Robert Goddard's primitive flight tests in 1926 through the creation of NASA from our first steps on the moon to construction of the International Space Station and planning a trip to Mars readers will meet the people and projects that have put the United States at the forefront of space exploration Along the way they'll learn How the United States beat the Soviets to the moon Why astronauts float in space Hint It's not for lack of gravity How fast rockets have to go to stay in orbit around Earth How we can look back in time through a space telescope With technology evolving and humanity's understanding of the universe expanding we are entering an exciting period of space exploration Authored by two veteran space writers with unique insights into the topic Star Bound offers up the story of Americans in space with a focus on the cultural and societal contexts of the country's most important missions rather than engineering and technical minutiae Vibrant positive and humorous Star Bound is packed with facts and stories for novice space fans And sprinkled in with the history are lists of the greatest space songs books movies and more all designed to make space exploration accessible to even the casual reader The Sirens of Mars Sarah Stewart Johnson, 2020-07-16 As a new wave of interplanetary exploration unfolds a talented young planetary scientist charts our centuries old obsession with Mars Beautifully written emotive a love letter to a planet DERMOT O'LEARY

BBC Radio 2 Mars bewilderingly empty coated in red dust is an unlikely place to pin our hopes of finding life elsewhere And yet right now multiple spacecraft are circling sweeping over Terra Sabaea Syrtis Major the dunes of Elysium and Mare Sirenum on the brink perhaps of a discovery that would inspire humankind as much as any in our history With poetic precision and grace Sarah Stewart Johnson traces the evocative history of our explorations of Mars She interlaces her personal journey as a scientist with tales of other seekers from Galileo to William Herschel to Carl Sagan who have scoured this enigmatic planet for signs of life and transformed it in our understanding from a distant point of light into a complex world Ultimately she shows how its story is also a story about Earth it is a foil a mirror a tell tale reflection of our own anxieties and yearnings to find if we re lucky that we re not alone Elegantly written and boundlessly entertaining Sunday Telegraph Beguiling The Times Johnson s prose swirls with lyrical wonder as varied and multi hued as the apricot deserts butterscotch skies and blue sunsets of Mars Anthony Doerr New York Times Book Review Elegantly crafted Lord Martin Rees Astronomer Royal Shoot for the Moon James Donovan,2019-03-15 The Apollo 11 mission and lunar landing is one of the most iconic moments in history and a landmark of technological and social achievement throughout the world Bestselling author James Donovan brings to life the epic story and the astronauts flight controllers and engineers who made it happen

Infinity Beckoned Jay Gallentine,2016 Infinity Beckoned illuminates a critical period of space history when humans dared an expansive leap into the inner solar system With an irreverent and engaging style Jay Gallentine conveys the trials and triumphs of the people on the ground who conceived and engineered the missions that put robotic spacecraft on the heavenly bodies nearest our own These dedicated space pioneers include such individuals as Soviet Russia s director of planetary missions who hated his job but kept at it for fifteen years enduring a paranoid bureaucracy where even the copy machines were strictly regulated Based on numerous interviews Gallentine delivers a rich variety of stories involving the men and women American and Russian responsible for such groundbreaking endeavors as the Mars Viking missions of the 1970s and the Soviet Venera flights to Venus in the 1980s From the dreamers responsible for the Venus landing who discovered that dropping down through heavy clouds of sulfuric acid and 900 degree heat was best accomplished by surfing to the five man teams puppeteering the Soviet moon rovers from a top secret off the map town without a name the people who come to life in these pages persevered in often trying thankless circumstances Their legacy is our better understanding of our own planet and our place in the cosmos Infinity Beckoned Jay Gallentine,2016-01-01 Account of unmanned lunar and planetary exploration from the early 1970s to the early 1990s **Born to Explore** Jay Gallentine,2025-12 Born to Explore chronicles the multifaceted adventures of NASA s John Casani who took us to the ends of the solar system but was largely overshadowed by astronauts and space shuttles Casani discusses his pivotal career private life and the stories which made him a legend
