Operational Intelligence for Health, Wellness, and Leadership Gamaliel Baer, David Schary, 2023-10-16 Operational Intelligence for Health Wellness and Leadership OIHWL addresses human behavior and the impact of lifestyle on the Big Three health outcomes of heart attack cancer and suicide It weaves together the concepts of resilience physical wellness nutritional wellness mental wellness and leadership OIHWL's model for behavior change is built

using Aristotle's philosophy of responsibility OIHWL is designed to show the application of the behavioral change model throughout the book. The result is a logically consistent and easy to follow framework that any firefighter can apply to their life and that any fire department can adopt and implement as education for its members. This remains the case even if some or all of the hundreds of citations eventually age out because the model is true. The final chapter presents an objective and thus assessable definition of leadership. It aims to displace the decades of leadership theory that is subjective in nature and often indistinguishable from management theory. Just as NFPA outlines categorically that certain fire apparatus are aerials and not engines, there is a way to distinguish categorically between leadership and management. OIHWL is the comprehensive guide for learning how to optimize behavior that is within your control.

These perforated three hole punched pages help provide practice on the principles taught in the main student textbook. Answer Keys. The answers are included for the worksheets, quizzes, and tests found in this Teacher Guide. Schedule A suggested calendar schedule is provided for completing the material in one year, though this can be adapted to meet individual student needs. There is also an accelerated schedule for completing the material in one semester. Are there any prerequisites for this course? This curriculum is aimed at grades 6-8, fitting into most math approaches the year or two years prior to starting high school algebra. If following traditional grade levels, Book 1 should be completed in grade 6 or 7 and Book 2 in grade 7 or 8. In Book 1, students should have a basic knowledge of arithmetic; basic arithmetic will be reviewed, but at a fast pace, and while teaching problem solving skills and a biblical worldview of math and sufficient mental development to think through the concepts and examples given.
