Generative AI Dr. Mohammad Shahid, Ms. Teresa Kwamboka Abuya, Mrs. A. Nazreen, Mr. B. Sivakumar, 2025-08-27

Generative AI is a comprehensive exploration of the transformative power of artificial intelligence in creating original and dynamic digital content. This book introduces readers to the fundamentals of generative models, tracing their evolution from early machine learning techniques to advanced architectures such as GANs, VAEs, diffusion models, and large language models (LLMs). It explains how these systems learn patterns, mimic creativity, and generate text, images, music, and even code that closely resembles human output. The book goes beyond theory, offering practical insights, case studies, and real-world applications of generative AI in diverse fields including healthcare, education, design, finance, entertainment, cybersecurity, and scientific research. It also highlights the ethical and societal challenges posed by this technology, such as misinformation, deepfakes, intellectual property concerns, and bias in AI-generated content, while emphasizing the importance of responsible innovation and governance. Designed for students, researchers, professionals, and technology enthusiasts, this book serves as both an academic reference and a practical guide. By bridging conceptual understanding with applied knowledge, it empowers readers to harness generative AI for creativity, innovation, and problem-solving. Richly detailed and future-focused, *Generative AI* provides a roadmap to understanding one of the most significant technological revolutions of our time. **New**

Technologies, Development and Application VII Isak Karabegovic, Ahmed Kovačević, Sadko Mandzuka, 2024-07-27. This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development and Application Advanced Production Processes and Intelligent Systems held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 20-22 June 2024. It covers a wide range of future technologies and technical disciplines including complex systems such as Industry 4.0, robotics, mechatronics, systems automation, manufacturing, cyber-physical and autonomous systems, sensors, networks, control, energy, renewable energy sources, automotive and biological systems, vehicular networking, and connected vehicles, and intelligent transport effectiveness and logistics systems, smart grids, nonlinear systems, power, social and economic systems, education, and IoT. The book *New Technologies Development and Application VII* is oriented toward the Fourth Industrial Revolution (Industry 4.0), which implementation will improve many aspects of human life in all segments and lead to changes in business paradigms and production models. Further, new business methods are emerging, transforming production systems, transport, delivery, and consumption, which need to be monitored and implemented by every company involved in the global market. **The AI**

Money Machine: Turn Large Language Models into Income Streams Pramod Joshi, 2025-10-31. Welcome to the future of income. In *The AI Money Machine: Turn Large Language Models into Income Streams*, discover how to transform the rise of artificial intelligence into your personal profit engine. This book is your step-by-step roadmap to building real, scalable income streams using tools like ChatGPT, Claude, and other large language models with no coding background or big investment.

required Whether you re a creator freelancer marketer or entrepreneur you ll learn how to leverage AI to automate work generate digital products and create businesses that run 24 7 This isn t another get rich quick gimmick It s a practical guide for those ready to adapt innovate and lead in the AI driven economy Generative AI in FinTech: Revolutionizing Finance Through Intelligent Algorithms Soumi Dutta,Álvaro Rocha,Ambuj Kumar Agarwal,Raj Gaurang Tiwari,Abhishek Bhattacharya,2025-03-19 This book delves into the intersection of generative artificial intelligence AI and the financial Technology FinTech industry This book provides a comprehensive exploration of how Generative AI a cutting edge subset of artificial intelligence is fundamentally altering the landscape of finance It meticulously unravels the intricate ways in which advanced algorithms powered by generative AI are transforming traditional financial processes decision making risk assessment portfolio management fraud detection and more Through a detailed analysis of theoretical concepts and practical applications we illustrate how generative AI techniques such as Generative Adversarial Networks GANs and Variational Autoencoders VAEs are empowering FinTech applications to generate synthetic financial data optimize trading strategies and enhance customer experiences Readers will gain a deep understanding of the potential of generative AI to create realistic financial scenarios model market behaviour and simulate various economic conditions for better planning and strategizing Moreover this book offers insights into ethical considerations and potential challenges associated with the use of generative AI in the FinTech domain emphasizing the importance of responsible and accountable deployment Additionally Generative AI in FinTech serves as a practical guide for professionals researchers and enthusiasts seeking to implement generative AI solutions within the financial sector It presents case studies and real world examples that demonstrate the effectiveness and impact of generative AI in various FinTech applications **Intelligent Automation** Marie Myers,Carol Brace,Lila Carden,2023-11-13 Since prehistoric times humans have invented ways to simplify daily activities to improve productivity The most recent milestone in this journey is robotic process automation RPA helping to build software robots that can be leveraged to automate mundane and repetitive tasks that can be labor intensive and prone to errors In recent years RPA has been integrated with emerging artificial intelligence AI and machine learning ML technologies to create what is referred to as intelligent automation IA emulating human actions and decision making abilities This book addresses the critical questions about the rise usage and future of IA practices This book is structured by general personas considered as its primary target audience ranging from Early stage practitioners seeking to learn effective management of IA programs Established IA practitioners seeking to drive maturity and scale Business leaders seeking to understand how to drive business value using IA Practitioners or academicians seeking to collaborate This book is strongly recommended for practitioners seeking to plan implement and scale IA practices in their organization and for researchers and students who intend to study strategy implementation and management of IA practice to accelerate the digital transformation agenda *International Conference on Lifelong Education and Leadership for All (ICLEL 2023)* Osman Titrek,Carlos Sousa de Reis,José Gijon Puerta,2024-02-28

Deep Learning with PyTorch Lightning Kunal Sawarkar,2022-04-29 Build train deploy and scale deep learning models quickly and accurately improving your productivity using the lightweight PyTorch Wrapper Key FeaturesBecome well versed with PyTorch Lightning architecture and learn how it can be implemented in various industry domainsSpeed up your research using PyTorch Lightning by creating new loss functions networks and architecturesTrain and build new algorithms for massive data using distributed trainingBook Description PyTorch Lightning lets researchers build their own Deep Learning DL models without having to worry about the boilerplate With the help of this book you ll be able to maximize productivity for DL projects while ensuring full flexibility from model formulation through to implementation You ll take a hands on approach to implementing PyTorch Lightning models to get up to speed in no time You ll start by learning how to configure PyTorch Lightning on a cloud platform understand the architectural components and explore how they are configured to build various industry solutions Next you ll build a network and application from scratch and see how you can expand it based on your specific needs beyond what the framework can provide The book also demonstrates how to implement out of box capabilities to build and train Self Supervised Learning semi supervised learning and time series models using PyTorch Lightning As you advance you ll discover how generative adversarial networks GANs work Finally you ll work with deployment ready applications focusing on faster performance and scaling model scoring on massive volumes of data and model debugging By the end of this PyTorch book you ll have developed the knowledge and skills necessary to build and deploy your own scalable DL applications using PyTorch Lightning What you will learnCustomize models that are built for different datasets model architectures and optimizersUnderstand how a variety of Deep Learning models from image recognition and time series to GANs semi supervised and self supervised models can be builtUse out of the box model architectures and pre trained models using transfer learningRun and tune DL models in a multi GPU environment using mixed mode precisionsExplore techniques for model scoring on massive workloadsDiscover troubleshooting techniques while debugging DL modelsWho this book is for This deep learning book is for citizen data scientists and expert data scientists transitioning from other frameworks to PyTorch Lightning This book will also be useful for deep learning researchers who are just getting started with coding for deep learning models using PyTorch Lightning Working knowledge of Python programming and an intermediate level understanding of statistics and deep learning fundamentals is expected

Artificial Intelligence in Clinical Practice Chayakrit Krittanawong,2023-09-13 Artificial Intelligence in Clinical Practice How AI Technologies Impact Medical Research and Clinics compiles current research on Artificial Intelligence within medical subspecialties helping practitioners with diagnosis clinical decision making disease prediction prevention and the facilitation of precision medicine The book defines the basic concepts of big data and AI in

medicine and highlights current applications challenges ethical issues and biases Each chapter discusses AI applied to a specific medical subspecialty including primary care preventive medicine general internal medicine radiology pathology infectious disease gastroenterology cardiology hematology oncology dermatology ophthalmology mental health neurology pulmonary critical care rheumatology surgery and OB GYN This is a valuable resource for clinicians students researchers and members of medical and biomedical fields who are interested in learning more about artificial intelligence technologies and their applications in medicine Provides the history and overview of the various modalities of AI and their applications within each field of medicine Discusses current AI based medical research including landmark trials within each field of medicine Addresses the current knowledge gaps that clinicians commonly face that prevent the application of AI based research to clinical practice Encompasses examples of specific cases and discusses challenges and biases associated with AI

Artificial Intelligence, Blockchain, Computing and Security Volume 1 Arvind Dagur,Karan Singh,Pawan Singh Mehra,Dhirendra Kumar Shukla,2023-12-01 This book contains the conference proceedings of ICABCS 2023 a non profit conference with the objective to provide a platform that allows academicians researchers scholars and students from various institutions universities and industries in India and abroad to exchange their research and innovative ideas in the field of Artificial Intelligence Blockchain Computing and Security It explores the recent advancement in field of Artificial Intelligence Blockchain Communication and Security in this digital era for novice to profound knowledge about cutting edges in artificial intelligence financial secure transaction monitoring real time assistance and security for advanced stage learners researchers academicians The key features of this book are Broad knowledge and research trends in artificial intelligence and blockchain with security and their role in smart living assistance Depiction of system model and architecture for clear picture of AI in real life Discussion on the role of Artificial Intelligence and Blockchain in various real life problems across sectors including banking healthcare navigation communication security Explanation of the challenges and opportunities in AI and Blockchain based healthcare education banking and related industries This book will be of great interest to researchers academicians undergraduate students postgraduate students research scholars industry professionals technologists and entrepreneurs

Artificial Intelligence and Work John Bratton,Laura Steele,2024-12-04 In an era marked by insecurity from neoliberalism financial volatility political instability regional conflicts pandemics and the climate crisis Artificial Intelligence AI is revolutionizing our work organizations societies and the environment This critical text explores who truly benefits from AI s development and deployment offering a comprehensive overview of AI s nature history and applications It delves into crucial themes such as the future of work digitalization neoliberalism s impact power dynamics ethics inequality gender race intersectional discrimination and environmental sustainability Unlike practical machine learning guides this book examines how AI and AI based technologies are transforming work highlighting both benefits and potential harms Combining critical management and leadership studies with organizational sociology it addresses societal

implications inequality ethics and power often overlooked by other textbooks John Bratton's lucid and engaging writing style brings a cutting edge subject to life blending breadth critical analysis and academic rigor Contemporary examples illustrate AI's real life implications for organizations and work today while thought provoking questions encourage readers to engage with and reflect on the topics throughout Authored by John Bratton an Honorary Professor at Queen's University Belfast and Laura Steele a Senior Lecturer in Business and Society at Queen's University Belfast this interdisciplinary text is essential for students studying contemporary and emerging issues in business and management including AI business analytics digitalization and the future of work It is also recommended for courses on the sociology of work ethics organization studies management leadership and HRM This book is poised to become an essential textbook for courses on AI digitalization and the future of work making it a valuable resource for students and educators alike Energy Conservation Update ,1981

Dannenberg,Steven Kemper,Kenneth P. Camilleri,2021-03-16 **The AI Delusion** Gary Smith,2018-08-22 We live in an incredible period in history The Computer Revolution may be even more life changing than the Industrial Revolution We can do things with computers that could never be done before and computers can do things for us that could never be done before But our love of computers should not cloud our thinking about their limitations We are told that computers are smarter than humans and that data mining can identify previously unknown truths or make discoveries that will revolutionize our lives Our lives may well be changed but not necessarily for the better Computers are very good at discovering patterns but are useless in judging whether the unearthed patterns are sensible because computers do not think the way humans think We fear that super intelligent machines will decide to protect themselves by enslaving or eliminating humans But the real danger is not that computers are smarter than us but that we think computers are smarter than us and so trust computers to make important decisions for us The AI Delusion explains why we should not be intimidated into thinking that computers are infallible that data mining is knowledge discovery and that black boxes should be trusted **Artificial**

Intelligence and Internet of Things in Smart Farming Mohamed Abdel-Basset,Hossam Hawash,Laila

Abdel-Fatah,2024-04-01 This book provides a broad overview of the areas of artificial intelligence AI that can be used for smart farming applications through either successful engineering or ground breaking research Among them the highlighted tactics are soil management water management crop management livestock management harvesting and the integration of Internet of Things IoT in smart farming Artificial Intelligence and Internet of Things in Smart Farming explores different types of smart farming systems for achieving sustainability goals in the real environment The authors discuss the benefits of smart harvesting systems over traditional harvesting methods including decreased labor requirements increased crop yields increased probabilities of successful harvests enhanced visibility into crop health and lower overall harvest and production costs It explains and describes big data in terms of its potential five dimensions volume velocity variety veracity and valuation

within the framework of smart farming The authors also discuss the recent IoT technologies such as fifth generation networks blockchain and digital twining to improve the sustainability and productivity of smart farming systems The book identifies numerous issues that call for conceptual innovation and has the potential to progress machine learning ML resulting in significant impacts As an illustration the authors point out how smart farming offers an intriguing field for interpretable ML The book then delves into the function of AI techniques such as AI in accelerating the development of nano enabled agriculture thereby facilitating safe by design nanomaterials for various consumer products and medical applications This book is for undergraduate students graduate students researchers and AI engineers who pursue a strong understanding of the practical methods of machine learning in the agriculture domain Practitioners and stakeholders would be able to follow this book to understand the potential of ML in their farming projects and agricultural solutions Features Explores different types of smart framing systems for achieving sustainability goals in the real environment Explores ML based analytics such as generative adversarial networks GAN autoencoders computational imaging and quantum computing Examines the development of intelligent machines to provide solutions to real world problems emphasizing smart farming applications which are not modeled or are extremely difficult to model mathematically Emphasizes methods for better managing crops soils water and livestock urging investors and businesspeople to occupy the existing vacant market area Discusses AI empowered Nanotechnology for smart farming

Progressive Computational Intelligence, Information Technology and Networking Poonam Nandal,Mamta Dahiya,Meeta Singh,Arvind Dagur,Brijesh Kumar,2025-07-22 Progressive Computational Intelligence Information Technology and Networking presents a rich and diverse collection of cutting edge research real world applications and innovative methodologies spanning across multiple domains of computer science artificial intelligence and emerging technologies This comprehensive volume brings together different scholarly chapters contributed by researchers practitioners and thought leaders from around the globe The book explores a wide array of topics including but not limited to machine learning deep learning cloud computing cybersecurity Internet of Things IoT blockchain natural language processing image processing and data analytics It addresses the practical implementation of technologies in sectors such as healthcare agriculture education smart cities environmental monitoring finance and more Each chapter delves into specific challenges frameworks and experimental outcomes making this book an essential reference for academicians researchers industry professionals and students who aim to stay ahead in the rapidly evolving digital world

Machine Learning and Deep Learning Modeling and Algorithms with Applications in Medical and Health Care Manoj Diwakar,Vinayakumar Ravi,Prabhishek Singh,Hoang Pham,2025-09-30 This book explains medical image processing and analysis using deep learning algorithms to analyze medical data It focuses on the latest achievements and developments in applying this analysis to medical imaging clinical and other healthcare applications The book covers among other areas Image acquisition and formation Computer aided diagnosis Image classification Feature extraction Image enhancement

segmentation Medical image processing issues such as segmentation visualization registration and navigation may seem to be distinct yet they are all intertwined in the process of resolving clinical bottlenecks Using deep learning algorithms researchers were able to achieve record breaking performance and set the bar for future research Due to the extensive quantity of medical imaging data of CT scan ultrasound and MRI there is widespread use of machine learning specifically deep learning to discover specific patterns on such data Such large data is well quantified by deep learning models Deep learning is now being utilized customized and particularly developed for medical image analysis as opposed to when it was first introduced to the community Having learned more about the techniques researchers have come up with innovative ideas for combining artificial intelligence AI with neural networks to solve difficult issues like medical image reconstruction The key features of this book are Machine learning and deep learning applications Medical imaging applications Feature extraction and analysis Medical image classification segmentation recognition and registration Medical image analysis and enhancement Handling medical image dataset

Deep Learning Research Applications for Natural Language Processing Ashok Kumar, L.,Karthika Renuka, Dhanaraj,Geetha, S.,2022-12-09 Humans have the most advanced method of communication which is known as natural language While humans can use computers to send voice and text messages to each other computers do not innately know how to process natural language In recent years deep learning has primarily transformed the perspectives of a variety of fields in artificial intelligence AI including speech vision and natural language processing NLP The extensive success of deep learning in a wide variety of applications has served as a benchmark for the many downstream tasks in AI The field of computer vision has taken great leaps in recent years and surpassed humans in tasks related to detecting and labeling objects thanks to advances in deep learning and neural networks Deep Learning Research Applications for Natural Language Processing explains the concepts and state of the art research in the fields of NLP speech and computer vision It provides insights into using the tools and libraries in Python for real world applications Covering topics such as deep learning algorithms neural networks and advanced prediction this premier reference source is an excellent resource for computational linguists software engineers IT managers computer scientists students and faculty of higher education libraries researchers and academicians

The Data Science Handbook Field Cady,2024-10-31 Practical accessible guide to becoming a data scientist updated to include the latest advances in data science and related fields Becoming a data scientist is hard The job focuses on mathematical tools but also demands fluency with software engineering understanding of a business situation and deep understanding of the data itself This book provides a crash course in data science combining all the necessary skills into a unified discipline The focus of The Data Science Handbook is on practical applications and the ability to solve real problems rather than theoretical formalisms that are rarely needed in practice Among its key points are An emphasis on software engineering and coding skills which play a significant role in most real data science problems Extensive sample code detailed discussions of important libraries and a solid grounding in core

concepts from computer science computer architecture runtime complexity and programming paradigms A broad overview of important mathematical tools including classical techniques in statistics stochastic modeling regression numerical optimization and more Extensive tips about the practical realities of working as a data scientist including understanding related jobs functions project life cycles and the varying roles of data science in an organization Exactly the right amount of theory A solid conceptual foundation is required for fitting the right model to a business problem understanding a tool s limitations and reasoning about discoveries Data science is a quickly evolving field and this 2nd edition has been updated to reflect the latest developments including the revolution in AI that has come from Large Language Models and the growth of ML Engineering as its own discipline Much of data science has become a skillset that anybody can have making this book not only for aspiring data scientists but also for professionals in other fields who want to use analytics as a force multiplier in their organization

Thank you definitely much for downloading **Ai Image Generator High Yield Savings Latest**. Maybe you have knowledge that, people have look numerous time for their favorite books considering this Ai Image Generator High Yield Savings Latest, but stop up in harmful downloads.

Rather than enjoying a good ebook as soon as a cup of coffee in the afternoon, otherwise they juggled taking into account some harmful virus inside their computer. **Ai Image Generator High Yield Savings Latest** is clear in our digital library an online entrance to it is set as public appropriately you can download it instantly.
