Artificial Intelligence in the Primary Classroom Gemma Clark,2024-05-28 Artificial intelligence AI has sparked a huge debate among teachers and school leaders Many questions arise about the trajectory of this new technology and where it will take us How will we differentiate between student authored work and AI generated content Will it lead to a loss of creativity and critical thinking skills What impact will it have on the dynamics of learning and teaching within schools These are all crucial topics for discussion yet AI has already become part of our reality and Gemma Clark firmly believes that embracing its potential is in our best interests In an era defined by technological advances Artificial Intelligence in the Primary Classroom stands as an indispensable resource that holds the key to transforming teaching and learning For educators burdened by bureaucratic tasks that divert precious time from actual teaching this book offers a lifeline It demonstrates how AI powered tools can alleviate administrative burdens enabling teachers to focus on the important job of nurturing young minds and to channel their energy and resources into higher impact activities such as crafting tailored learning experiences giving children personalised feedback and improving engagement From time consuming tasks like lesson planning assessment marking and automating report writing processes to facilitating content creation the book details tangible ways in which AI can streamline workflows improve teaching and restore work life balance Other examples include Spelling Lessons Save time when planning your spelling lessons by using AI to automatically generate a comprehensive list of phonemes or sounds suitable for teaching young children Mindfulness in the Classroom If you are interested in incorporating

mindfulness games and activities to assist children in relaxation and focus AI can provide valuable suggestions for fostering pupil and staff wellbeing PE Lessons You don't have to be an expert in sports to teach PE Whether it's tennis football rugby or running AI can offer suggestions for activities warm ups and cool downs to use in your PE lessons Art Lessons AI can be an excellent resource for planning art lessons especially when seeking suggestions to emphasize one of the eight elements such as line shape form colour value texture space and value Maths Lessons As with spelling AI can significantly reduce the time spent on creating maths questions and simplify the process of differentiation Artificial Intelligence in the Primary Classroom is filled with practical strategies engaging activities and useful tips and tricks that will save teachers time and energy Gemma provides transferrable ideas and lesson plans with step by step instructions that can be adapted and used in secondary settings as well as primary Backed up by real world examples throughout this book empowers teachers to embrace AI as a tool in fostering enhanced learning experiences while also reclaiming invaluable time for pedagogical creativity Suitable for primary school teachers of all levels of experience

Invocational Media Chris Chesher, 2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media
