Negation Text Worlds And Discourse Advances In Discourse Processes:

Negation, Text Worlds, and Discourse Laura Hidalgo-Downing, 2000-05 This work originates from the need to develop an integrated dynamic model of negation in discourse that is adequate for understanding the role of negation in an extensive and complex piece of discourse Most work on negation is strongly influenced by traditional philosophical problems but little work has been carried out in the area of discourse Approaches to negation within the functional cognitive tradition tend to focus on specific agents of negation its function as a speech act or its cognitive model Few attempts have been made to propose an integrated discourse model studies of negation with few exceptions tend to be limited to brief selections or isolated sentences This book fills the gap in studies of negation in discourse by providing an up to date critical review of the state of the art in negation and by proposing a model that brings together the semantic cognitive and pragmatic features of negation which are crucial for an understanding of its role in discourse

World Building in Spanish and English Spoken Narratives Jane Lugea, 2016-06-16 Text World Theory is a powerful framework for discourse analysis that thus far has only been used in monolingual Anglophone stylistic analyses This work adapts Text World Theory for the analysis of Spanish discourse and in doing so suggests some improvements to the way in which it deals with discourse in particular with direct speech and conditional expressions Furthermore it applies Text World Theory in a novel way searching not for style in language but for the style of a language Focusing principally on deixis and modality the author examines whether Spanish speakers and English speakers construct the narrative text world in any patterned ways To do so the frog story methodology is employed eliciting spoken narratives from native adult speakers of both languages by means of a children's picture book These narratives are transcribed and subjected to a qualitative text world analysis which is supported with a quantitative corpus analysis The results reveal contrasts in Spanish and English speakers' use of modality and deixis in building the same narrative text world and are relevant to scholars working in language typology cross cultural pragmatics and translation studies These novel applications of the Text World Theory push the boundaries of stylistics in new directions broadening the focus from monolingual texts to languages at large

Pragmatics, 2002

The Oxford Handbook of Reading Alexander Pollatsek, Rebecca

Treiman, 2015-07-21 Writing is one of humankind's greatest inventions and modern societies could not function if their citizens could not read and write. How do skilled readers pick up meaning from markings on a page so quickly and how do children learn to do so? The chapters in the Oxford Handbook of Reading synthesize research on these topics from fields ranging from vision science to cognitive psychology and education, focusing on how studies using a cognitive approach can shed light on how the reading process works. To set the stage, the opening chapters present information about writing systems and methods of studying reading, including those that examine speeded responses to individual words as well as those that use eye movement technology to determine how sentences and short passages of text are processed. The following section discusses the identification of single words by skilled readers as well as insights from studies of adults with reading disabilities due to brain damage. Another section considers how skilled readers read a text silently, addressing such issues as the role of sound in silent reading and how readers' eyes move through texts. Detailed quantitative models of the reading process are proposed throughout. The final sections deal with how children learn to read and spell and how they should be taught to do so. These chapters review research with learners of different languages and those who speak different dialects of a language, discuss children who develop typically as well as those who exhibit specific disabilities in reading, and address questions about how reading should be taught with populations ranging from preschoolers to adolescents and how research findings have influenced education. The Oxford Handbook of Reading will benefit researchers and graduate students in the fields of cognitive psychology, developmental psychology, education, and related fields, e.g., speech and language pathology, who are interested in reading, reading instruction, or reading disorders.

The Routledge Handbook of Stylistics Michael Burke, 2023-05-29 This second edition of The Routledge Handbook of Stylistics provides a comprehensive introduction and reference point to key areas in the field of stylistics. The four sections of the volume encompass a wide range of approaches from classical rhetoric to cognitive neuroscience. Issues that are covered include historical perspectives centring on rhetoric, formalism, and functionalism; the elements of stylistic analysis, including foregrounding, relevance theory, conversation analysis, narrative, metaphor, speech and thought, presentation and point of view; current areas of influential research such as cognitive poetics, corpus stylistics, critical stylistics, multimodality, creative writing, and reader response; four newly commissioned chapters in the emerging fields of cognitive grammar, forensic linguistics, the stylistics of children's literature, and a corpus stylistic study of mental health issues. All of these new chapters are written by leading researchers in their respective fields. Each of the 33 chapters in this volume is written by a specialist. Each chapter provides an introduction to the subject, an overview of its history, an instructive example of how to conduct a stylistic analysis, a section with recommendations for practice, and a discussion of possible future developments in the area for readers to follow up on. The Routledge Handbook of Stylistics, second edition, is essential reading for researchers, postgraduates, and undergraduate students working in this area.

Professional Genres from an Interpersonal Perspective Christopher Hopkinson, Renáta Tomášková, Gabriela

Zapletalová, 2016-05-11 This volume brings together contributions focused on and shaped by two areas of linguistic research: genre analysis and the interpersonal component of language and discourse. It explores the interplay and interaction of genre and the interpersonal component, revealing potential connections and interdependencies between genre conventions and the realisation of interpersonal meanings viewed from the perspective of the systemic functional approach to language and discourse analysis. The contributions focus on a variety of aspects of the interpersonal in selected genres of professional discourse, including not only communication among professionals but also genres produced by professionals to address non-specialists. The volume consists of nine chapters grouped into three sections, guiding readers through four major discourse domains: namely media discourse, academic discourse, institutional discourse, and promotional discourse. Institutional and promotional discourses are combined in a single section, reflecting the hybridism of the majority of the genres under investigation here. Genres of institutional discourse typically exhibit features akin to advertising, not only presenting the institutions in terms of the scope of their activities and services but also serving a clear promotional purpose. The studies document how omnipresent, varied, and plentiful the strategies of intersubjective positioning are, and how significant their position in genres and discourses invariably is. The social and cultural grounding of genres requires them to be conventional, yet it also ensures their flexibility, continuous development, and change, qualities which make genres a permanent challenge and inspiration for research and discussion.

Advances in Automatic Text Summarization

Inderjeet Mani, Mark T. Maybury, 1999 Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available online at an incredible rate. One result is the oft-decried information overload. No one has time to read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches, Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Making Sense of Narrative Text Michael Toolan, 2016-06-03 This book takes the following question as its starting point: What are some of the crucial things the reader must do in order to make sense of a literary narrative? The book is a study of the texture of narrative fiction using stylistics, corpus linguistic principles, especially Hoey's work on lexical patterning, narratological ideas, and cognitive stylistic work by Werth, Emmott, and others. Michael Toolan explores the textual, grammatical nature of fictional narratives, critically re-examining foundational ideas about the role of lexical patterning in narrative texts, and also engages the cognitive or psychological processes at play in literary reading. The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the reader's experience in the course of reading narratives, and particularly concerning the role of language in that comprehension and experience. The ideas of situation, repetition, and picturing are all central to the book's argument about how readers process story, and Toolan also considers the ethical and emotional involvement of the reader, developing hypotheses about the text linguistic characteristics of the most ethically and emotionally involving portions of the stories examined. This book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics, cognitive stylistics, and literary text and texture.
