Network Design Basics For Cabling Professionals:

Network Design Basics for Cabling Professionals BICSI,2002-04-04 Here is the most reliable proven and authoritative training material available for those wishing to make the career enhancing jump from installing data systems to actually designing them This heavily illustrated volume provides the time tested methods and procedures you need to master the design and customization of network infrastructure plans capable of meeting a clients most exacting requirements

Network Design Basics for Cabling Professionals BICSI,2002-04-25 This heavily illustrated resource is part of BICSI s official training material for professional cabling professionals who want to learn how to design data systems as well as install them The book teaches by example breaking each task into bulleted steps Prepares telecom cabling professionals to enter the world of corporate IT Teaches industry standard practices and protocols Provides vendor neutral understanding of hardware and cabling technologies Clearly and simply explains standards and topologies at the technician level *Methodologies and*

Protocols for Wireless Communication in Large-Scale, Dense Mesh Networks Stefan Unterschütz,2014-04-30 This dissertation examines concepts for wireless communication in large scale dense mesh networks which can be used in future for plant control or building automation It is shown that recent communication approaches for resource constrained IEEE 802.15.4 hardware do not scale well This motivates the development of methodologies and protocols for reliable wireless communication in large scale networks This work covers the following topics a toolbox for the development programming testing and simulation of communication protocols for embedded systems the decomposition of large networks into smaller subnets concepts for scalable broadcasting and routing the realization of selected network services such as emergency shutdowns and software updates

Smart Product Engineering Michael Abramovici,Rainer Stark,2013-03-14 The collection of papers in this book comprises the proceedings of the 23rd CIRP Design Conference held between March 11th and March 13th 2013 at the Ruhr University Bochum in Germany The event was organized in cooperation with the German Academic Society for Product Development WiGeP The focus of the conference was on Smart Product Engineering covering two major aspects of modern product creation the development of intelligent smart products as well as the new smart approach of engineering explicitly taking into account consistent systems integration Throughout the 97 papers contained in these proceedings a range of topics are covered amongst them the different facets and aspects of what makes a product or an engineering solution smart In addition the conference papers investigate new ways of engineering for production planning and collaboration towards Smart Product Engineering The publications provide a solid insight into the pressing issues of modern digital product creation facing increasing challenges in a rapidly changing industrial environment They also give implicit advice how a smart product or engineering solution processes methods and tools needs to be designed and implemented in order to become successful
