While Google doesn't specify a recommended length for SEO title tags, some say the ideal length is between 50–60 characters. This length is associated with higher search clicks and is less likely to be rewritten by Google. Most desktop and mobile browsers can display the first 50–60 characters of a title tag, and research suggests that titles under 60 characters have about a 90% chance of displaying properly in search engine results pages (SERPs). However, Google's title update prefers shorter titles, and titles that are too long are more likely to be rewritten.

Space Return Pasquale De Marco, 2025-05-07 *Space Return* is a gripping exploration of one of the most enigmatic events in the history of space exploration the mysterious disappearance and subsequent reappearance of the space shuttle *Venture*. After a decade long absence the *Venture* returned to Earth with its crew missing and the pilot in a catatonic state. The ship itself bore signs of substantial modifications hinting at the extraordinary events that had transpired during its long absence. A team of experts drawn from the fields of science psychology and engineering has been assembled to unravel the secrets surrounding the mission. Their task is to piece together the fragments of evidence and reconstruct the events that led to the shuttle's disappearance and subsequent reappearance. As the investigation unfolds startling discoveries are made challenging our understanding of space travel and the limits of human endurance.
