Nederlandse Realisten Na 195:

Het verhaal van de Nederlandse literatuur: Verlichting. Romantiek. Realisme-Naturalisme. Multatuli en Gezelle Freddy de Schutter,1992 *Realisme in de kunst- en literatuurbeschouwing in Nederland tot 1875* Toos Streng,1995 **Jonge nederlandse realisten van galerie Mokum, Gemeentemuseum Arnhem** ,1969 Dutch Neorealism, Cinema, and the Politics of Painting, 1927-1945 Stephanie Lebas Huber,2024-08-12 This study offers a radically new perspective on Dutch Neorealism one that emphasizes the role of film as an apparatus the effects of which when emulated in painting can reproduce the affective experience of film watching More of a tendency than a tightly defined style or ism Neorealism is the Dutch variant of Magic Realism an uncanny mode of figurative painting identified with Neue Sachlichkeit in Germany and Novecento in Italy Best represented by the Dutch artists Pyke Koch Carel Willink Charley Toorop Raoul Hynckes Dick Ket and Wim Schuhmacher Neorealism as demonstrated in this book depicted societal disintegration and allegories of looming disaster in reaction to the rise of totalitarian regimes and eventually the Nazi Occupation of The Netherlands The degree to which these artists exhibited either revolutionary or reactionary sentiments usually corresponding with their political affiliation is one of the central problematics explored in this text The book will be of interest to scholars working in art history World War II history and film studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Handboek tot de geschiedenis der Nederlands letterkunde: deel. Moderne literatur (vervolg), Derde tijdvak 1875-1916 Gerard Knuvelde,1961 **The Eclipse of Liberal Protestantism in the Netherlands** Tom-Eric Krijger,2019-09-16 In *The Eclipse of Liberal Protestantism in the Netherlands* Tom Eric Krijger is the first to offer a synthesis of the development of the Protestant modernist movement in Dutch religious social cultural and political life between 1870 and 1940 In historiography the liberal Protestant community is said to have lost appeal and influence in these decades due to a lack of theological clarity inner harmony and organisation Analysing liberal Protestants self perception vis vis Christian orthodoxy self understanding as a faith community attitude towards other alternatives to orthodoxy class consciousness literary criticism political commitment and involvement with foreign mission Krijger challenges this view Making an international comparison he argues that the Dutch modernist movement failed to make headway primarily due to liberal Protestant expectations and discourse Reiziger in scheerapparaten Niels Bokhove,1984 Magisch realisten en tijdgenoten Gemeentemuseum Arnhem,Jan Brand,Carel Blotkamp,1992 **Symbolisme en nieuwe mystiek in Nederland voor 1900** Elisabeth Leijnse,1995 Mit franz Zusammenfassung **The Social Sciences of Quantification** Isabelle Bruno,Florence Jany-Catrice,Béatrice Touchelay,2016-09-29 This book details how quantification can serve both as evidence and as an instrument of government whether when dealing with statistics on employment occupational health and economic governance or when developing public management or target driven policies In the process it presents a thought provoking

homage to Alain Desrosières who pioneered ways to study large numbers and the politics underlying them. It opens with a summary of Desrosières's contributions to the field in which several generations of researchers detail how this statistician and historian profoundly influenced them. This tribute based on personal testimonies bears witness to the vitality of the school of thought and analytical framework Desrosières initiated. Next a collection of essays explores the statistical argument in the neoliberal era examining issues such as counting the homeless in Europe, measuring the performance of public services and quantifying the effects of public action on the unemployed in France. The third part details the uses of quantification. It reveals that although statistics are frequently used to the advantage of those in power, they can also play a vital role in challenging and resisting both the conventions underlying the measurements as well as the measurements themselves. Featuring the work of economists, historians, political scientists, sociologists and statisticians, this title provides readers with a thoughtful look at an influential figure in the history of statistics. It also shows how statistics are used to direct public policy, the degree of conflict that is possible in their production and the disputes that can develop around their uses. **Ritueel van huiselijk geluk** Susan Aasman, 2004 **Notariële nieuwigheden 2004-2005** Christoph Castelein (Redactie), Luc Weyts (Redactie), 2005 Bibliographie der fremdsprachigen Zeitschriftenliteratur Felix Dietrich, Reinhard Dietrich, 1911

Pleasant Places Walter S. Gibson, 2000-04-22. The variations of pleasure and their expression in Dutch rustic landscapes of the seventeenth century are recurring themes in Walter S. Gibson's engaging new book. Gibson focuses on Haarlem between 1600 and 1635 in his interpretation of Dutch landscapes and emphasizes prints, the medium in which the rustic view was first made available to the general art-buying public. Gibson begins by looking at the origins of the rustic landscape in the sixteenth-century Flanders and its later reformation by Dutch artists, a legacy very much alive today. He next offers a critical review of scriptural reading, a popular mode of interpreting the Dutch rustic landscape that incorporates Calvinist-influenced moral allegories. Gibson then explores traditional ideas concerning recreation and suggests that the pleasure of rural landscapes not preaching constituted their chief appeal for seventeenth-century urban viewers. Using Visscher's *Plaisante Plaetsen*, *Pleasant Places* as a point of departure, Gibson examines the ways that townspeople, both the day-trippers and owners of country houses, experienced the Dutch countryside. He also discusses the role of staffage and suggests how the representations of peasants might have conditioned the responses of contemporary viewers to rural images. Finally, Gibson considers how scenes of the dilapidated farm buildings, dead trees and other evidence of material decay may reflect traditional ideas of rustic life as imagined by a townsman. Or how they may represent another way for the artist to engage his urban audience far removed from the idealized landscapes of a Giorgione. The rustic landscape of a Ruisdael conveys a countryside that was beginning to disappear under the relentless pressures of urbanization. Gibson's multilayered exploration of the rustic landscape enhances our understanding of the Golden Age in Dutch art. His richly illustrated book recalls a countryside now largely gone; at the same time, his evocative language gracefully articulates the role of the Dutch rustic
